W2: Workshop - Education
Building Blocks for a Successful, Sustainable Interprofessional (IPE) Health Care Program

Saturday, March 13, 2010 10:15a.m. to 11:45a.m. 105/107 Bluemle Life Sciences Building

Sheree Aston, Western University of Health Sciences, California
Susan Mackintosh, Western University of Health Sciences, California
Sarah Garber, Rosalind Franklin University, Illinois
Diane Bridges, Rosalind Franklin University, Illinois
Susan K. Tappert, Rosalind Franklin University, Illinois

To provide an overview of an IPE model and components that are important for a successful, sustainable IPE program.

Western University of Health Sciences and Rosalind Franklin University are both large health science universities and members of the Association of Academic Health Centers. Both institutions offer a comprehensive IPE program involving a multitude of health professional program students.

The long term viability of an interprofessional program is related to the planning and development approach and fundamental, permanent and stable elements such as infrastructure, staffing, patient base, faculty time, assessment and training.
