**Donor Web Site Increasing Kidney Transplants**

A web site created earlier this year for the Kidney Transplant Program at Thomas Jefferson University Hospital has led to increasing numbers of successful kidney transplant procedures. Both donors and patients are encouraged to visit the web site – to gain information and access to a new and comprehensive series of kidney transplant programs that provide previously unavailable opportunities for one person to donate a kidney to another. These programs have been developed to facilitate live donor renal transplantation among patients who have immunologic barriers to live donor renal transplantation, says Lloyd E. Rutner, M.D., Director of Transplantation at Jefferson University Hospital. Patients or donors interested in being considered for these programs are able to register through the web site. Then, a transplant nurse coordinator contacts them for additional information and to answer any questions about the exchange programs and live donor options.

**Live Donor Transplants**

Transplants performed from living donors have several advantages compared to transplants performed from non-living donors. And one reason why live-donor transplants have higher success rates is that the living donors who are chosen have been carefully screened and are very healthy. “These programs are intended to offer solutions to those who are in need of a kidney transplant and who have friends or relatives willing to donate a kidney, but are unable to do so either because their blood types don’t match or because there are other immunologic reasons that prohibit transplantation,” says Dr. Rutner. One dramatic example of the programs’ success was Jefferson’s and the region’s first “donor swap,” which required four surgeons working simultaneously in unusual live donor transplant procedures involving two married couples, with one husband donating to another husband, and his wife donating to the other wife. According to the United Network of Organ Sharing (UNOS), 15,000 people are waiting for kidney transplants in the United States. The four programs recently established by Jefferson University Hospital orthopedic surgeons working simultaneously are: Live Donor Paired Kidney Exchange Program (Donor Swap) and ABO Blood Group Incompatible Kidney Transplant Program; Positive Crossmatch Live Donor Kidney Transplant Program; Allostric Strangers Live Donor Program, Regional and national news coverage; Jefferson’s Public Relations Department generated for Jefferson’s first positive crossmatch transplant has resulted in a number of patients calling for evaluations. To learn more about the programs, visit the web site.

**A New Option to Treat Hip Dysplasia or Shallow Socket**

“A hip dysplasia or shallow socket” describes a shallow socket or “‘ill-fitting’ hip joint. An ‘osteootomy’ or redirection of the bone, involves deepening and reshaping the hip using the patient’s own bone and natural lining of the joint and requires special cuts of the pelvis’ bone and fixation with the use of screws. In the past, most adults with hip dysplasia were not treated until their arthritis became severe enough that they needed hip replacement,” says Jefferson Hospital orthopedic surgeon Javad Parvizi, M.D., FRCS. “With the Ganz osteotomy patients can receive treatment early, and save themselves from years of pain.” Dr. Parvizi trained under Swiss surgeon Reinhold Ganz, who developed the procedure in the mid-1980s. Dr. Parvizi performed approximately 25 Ganz osteotomies with Dr. Ganz in Berne, Switzerland. “Compared to total hip replacement, the Ganz procedure is more conservative in that it preserves the original bone and cartilage, so it’s an ideal choice for many young patients,” says Dr. Parvizi. “The osteotomy does not change the diameter of the pelvis and hence is attractive for young women who may want to have children. It allows patients to start weight-bearing fairly soon after the operation.”

Dr. Parvizi describes the typical Ganz osteotomy candidate: “Our patients tend to be in their 30s and 40s, and sometimes their 20s, and have severe hip pain that prevents them from doing their daily activities. “However, they don’t have arthritis of such a severe nature that would be unsuitable to treatment by total hip osteotomies.”

**Visit Web to Read Patient Success Story**

To read more about osteotomy and how the procedure changed the life of a New Jersey mother after years of disability, visit www.jeffersonhospital.org/news/ and click on the link headed A New Option for Sufferers of Hip Dysplasia or Shallow Socket.

**Spring for ‘Philly Ducks’!**

See Page 3 to find out why!
Demetrios Bagley, MD, Named Nathan Lewis Hatfield Professor of Urology

Demetrios Bagley, MD, Professor of Urology and Radiology, Jefferson Medical College, has been named the Nathan Lewis Hatfield Professor of Urology. The announcement was made by Leonard G. Gomella, MD, the Bernard W. Gomski Professor of Prostate Cancer and Chairman, Department of Urology. Dr. Bagley has been on the faculty of Thomas Jefferson University since 1983 and is an internationally recognized leader in the field of endourology. He pioneered much of the instrumentation that is used in the uroscopic management of kidney and ureteral diseases such as stones and tumors. “Dr. Bagley has been an outstanding clinician, researcher and mentor to countless graduate students and has given new meaning to endourology careers in the field of endourology,” according to Dr. L. G. Gomella, Chairman of the Department of Urology. “We are pleased to appoint him the next Nathan Lewis Hatfield Professor of Urology.”

The professorship was previously held by S. Grant Muhilalond, MD, Chairman Emeritus of the Department of Urology. The Nathan Lewis Hatfield professorship was established at Jefferson Medical College in memory of the father of Henry Reed Hatfield, an 1881 graduate of the College.

Pictured left, left to right, are Dr. D. Jefferson, President; Dr. L. G. Gomella, Chairman; Dr. S. G. Muhilalond, Emeritus Chairman; and Dr. D. Bagley, Professor. The announcement was made at the Jefferson Medical College, 10th Floor, Career Development Center, 10th Floor, Building 27, 10th Floor, Career Development Center, 10th Floor, Building 27, 10th Floor, Career Development Center.

James T. Diehl, MD, Named Acting Director of Cardiac Surgery

James T. Diehl, MD, has been named Acting Director of Cardiac Surgery, Department of Surgery, as Nurse Practitioner. Ms. Denest Caroline Denest, MSN, CRNP, Professor and Chair of Surgery, has announced.

In making the announcement, Dr. Dale said, “Dr. Diehl will replace Dr. Richard Edie who has already run the cardiac surgery program for the past 16 years. Dr. Diehl is widely regarded as a skilled cardiac surgeon who has been a prominent member of the Division of Cardiac Surgery at Jefferson since 1994. The Search Committee will continue to evaluate candidates, including Dr. Diehl, for the permanent position.”

“Dr. Diehl will pursue the primary goal of diversification within cardiac surgery – the treatment of coronary disease by innovative techniques (e.g., off-pump, robotics), valve repair and replacement (e.g., minimally invasive surgery) and chronic heart failure surgery (e.g., assist devices, transplantation).” Dr. Diehl will begin to aggressively recruit young, well-trained cardiac surgeons to accomplish this goal.”

Caroline Denest, MSN, CRNP, joins Cardiac Surgery

Caroline Denest, MSN, CRNP, has joined the Division of Cardiac Surgery, Department of Surgery, as Nurse Practitioner. Ms. Denest earned her MSN from the University of Delaware in 2000, with a specialty of Adult Nurse Practitioner and Cardiopulmonary Clinical Nurse Specialist. She is Board certified as an Adult Nurse Practitioner and in Critical Care Nursing. Ms. Denest received a BSN from Eastern College, Philadelphia in 1987, an RN from Pennsylvania Medical College in 1983 and an LPN from Camillus Mercy School of Practical Nursing in 1979. Before coming to Jefferson, she served as a Hospitallist in a private cardiology practice in Lancaster, PA.

In Memoriam

Margaret E. Herbut

The Jefferson community mourns the death August 1. in Rosemont of Margaret Fetsko Herbut, widow of Peter Andrew Herbut, MD, who served as President of Thomas Jefferson University 1967 until his sudden death in 1976. For many years, Mrs. Herbut was active with the Women’s Board of Thomas Jefferson University Hospital and was a Past President of the Faculty Wives Club of Jefferson Medical College (JMC). She was also a Past President of the Philadelphia County Medical Society. Alliance, formerly Medical Society Auxiliary, which raised funds for medical and nursing scholarships. Mrs. Herbut is survived by two daughters, three grandchildren and two great-granddaughters.

Her husband was honored posthumously when the JMC auditorium was named the Herbut Auditorium in 1979. The Peter A. Herbut Professorship of Pathology was established in 1985 by friends and colleagues.

OPT Benefits Fair Set for October 28

Be sure to attend this year’s OPT Benefits Fair on Tuesday, October 28, from 3:30 pm to 4 p.m. at McCallan Hall, second floor; College Building or senior.

For the answer to your questions regarding Jefferson’s benefits at one place - from the experts - the Benefits Fair is the place to be.

Representatives from these organizations and Jefferson departments will be on hand:

- Bank: First Union, Commerce
- PNC: Hudman United and the Freedom Credit Union
- Insurance Companies: Blue Cross, CSHP, PPO (MO), Keytone Health Plan, Delta Dental, Express Scripts (drug prescription), MetLife (life insurance and LTD), and Long-term disability.

Group briefing for employees will be conducted to review benefit changes that are going to take effect as of January 1, 2004. Be sure to check your in the dates and times of these sessions.

You can call the Benefits Office at 215-503-7895 with your questions between 7:30 a.m. and 5 p.m. After 5 p.m. you may leave a message on voicemail at 215-503-1186 so that a Benefits staff member can return your call the following workday.

The Benefits staff looks forward to seeing you at the Benefit Fair on October 28!

Elisabeth J. Kunkel, MD, Psychiatry Vice Chair, Selected for National Leadership Program

Elisabeth J. Shankin Kunkel, MD, Vice Chair of Clinical Affairs and Professor of Psychiatry and Human Behavior, Jefferson Medical College (JMC), has been accepted into a national leadership program that helps prepare mid-career senior administrative roles in academic health.

Dr. Kunkel was named a fellow in 2003. “Clinical Research Trials for AIDS Treatment Under Way”

Physician and nursing staffs of the hospital’s Department of Pulmonary Medicine and Critical Care are conducting clinical research trials to find new and potentially useful therapeutic agents to treat AIDS, or Acute Respiratory Distress Syndrome. AIDS is an inflammatory disease of the lung that often proves fatal. It can originate from specific medical conditions such as pneumonia or trauma to the lung, and is difficult to distinguish from other conditions of the lung, such as pulmonary edema or respiratory failure. Principal Investigator is pulmonary care physician Jonathan E. Gottlieb, MD, the hospital’s Senior Vice President for Clinical Affairs and Chief Medical Officer. Co-Investigators are trauma surgeon Michael S. Weinsten, MD, Pauline K. Park, MD, Murray J. Cohen, MD, and Kris R. Kauback, MD.

For more information, call 215-555-4233. To refer a patient, call 215-555-4893.

Michael Root, MD, PhD, Receives Foundation Awards

Michael Root, MD, PhD, Assistant Professor of Microbiology and Immunology, Jefferson Medical College (JMC), and a member of the Kimmel Cancer Center, has been named an Ellison Medical Foundation New Scholar in G lobal Infectious Diseases for 2003. Dr. Root, whose research to date has focused on understanding the process by which the HIV virus invades cells, will receive $200,000 over four years to generalize his findings to other viruses of global health concern, including the Ebola virus and the SARS virus.

The Ellison Medical Foundation, based in Bethesda, MD, makes grants for scientific projects that stimulate new, creative research centering on the aging process as well as infectious disease. The objective of the New Scholars Program is to support innovative investigators early in their careers who engage in promising projects focusing upon molecular mechanisms related to cellular mechanisms that produce diseases.

Dr. Root’s research has led to the design of a new class of HIV entry inhibitors. “It is very exciting to be able to take these studies to the next level over a period of time, which this grant allows,” says Dr. Root. “My goal is to conduct investigations that will lead to a better understanding of the infectious mechanisms of these potent viruses, and in so doing, help discover better treatment strategies.”

A second one-year grant to Dr. Root from The American Foundation for AIDS Research (amfAR) furthers his lab’s HIV research. The New York City-based foundation, which is dedicated to the support of HIV/AIDS research, AIDS vaccine and treatment, awarded the advocacy and the support of AIDS-related public policy work, totaling $84,000 to Dr. Root to support his continuing research on the inhibition of HIV-1 membrane fusion by 5-Helix. This is a two one-year grant from amfAR to fund research that aims to enhance understanding of how HIV-1 invades cells and how this can be prevented.

Since 1985, amfAR, a leading nonprofit organization, has funded grants to over 2,000 research teams worldwide, including more than $335,000 provided to Jefferson researchers since 1989. Visit the Jefferson Office of Institutional Advancement website at www.jeff.edu/advancement for more information.
Jefferson Heditary Cancer Center Expansion Cancer Prevention Services

The Jefferson Heditary Cancer Center (JHCC) is sponsoring the "Concert to Celebrate Life," the ninth annual concert to benefit the Network's Hospice and Home Care Programs.

The event promises a fun-filled evening of pops, Broadway and classical music with the well-known Orchestra of St. Peter. By the Sea conducted by Reverend Alphonse Stephenson, who is

The Home Care Network of JHS is sponsoring the "Concert to benefit the Network's Hospice and Home Care Programs.

The JHCC was established to provide patient services and head social service organizations.

The JHCC offers a wide range of services and expert staff to enable patients to stay in the comfort and security of their own homes during times of illness, disability and recuperation.

The concert will be held Friday, October 3, at 8 p.m. in the Founder's Centennial Hall, 450 Lancaster Ave., Haverford, PA. Tickets are $20 per person, or $15 for students and seniors, in advance or at the door.

Call 610-658-7163.

Answer to ‘Help Direct Our Patients’
Jefferson Hospital’s Admissions Office (Patient Access Center) is located on the lower level, near the main entrance. To get there, follow the signpost at the main entrance, in the corridor between 11th and 10th Streets. Direct patients to the corridor which will lead them to Suite 8100 – The Admissions Office.

Pennsylvania is one of 11 states to bring forth lawsuit against social media giants for all those tweets and posts.

Free Flu Shots Now Available
Free flu shots are now available to Jefferson employees and students at University Health Services, 3325 Cobbin Building, 215-595-8435.

To place or a base line of competencies, not written copy, and a photograph of your review.
