Reporting a violation of the Student Sexual Misconduct Policy

Non-confidential employees are required to report all of the details of an incident to Campus Security and the Title IX Coordinator. Confidential employees may talk to a victim in confidence, and only report that an incident occurred without revealing any personally identifying information. If an anonymous report is made the identity of the victim will not be known, but the university’s ability to respond will be limited. See www.jefferson.edu/titleix for more information.
