*You are required to purchase generic drugs when available. Otherwise, you will be required to pay the difference in cost between the generic and the name brand, along with applicable copay.

Using Jefferson Pharmacies is Required for Certain Types of Prescriptions

If you have a condition that requires medication for a long period of time ("maintenance medication"), your doctor can order up to a 90-day supply of eligible maintenance drugs. At the Jefferson pharmacies, the copay for a 90-day supply is $30 for generic and $40 for brand name drugs.

If you choose to use a retail pharmacy for maintenance medication, you may only fill the initial prescription and one refill at a retail pharmacy. Thereafter, refills are required to be filled at a Jefferson Pharmacy.

Certain other drugs ("mandatory in-house") are also required to be filled at a Jefferson pharmacy; otherwise, the drug will not be covered. The mandatory in-house list includes drugs which are self-injected or require special handling, along with some that are more common.

Please note the following categories and examples:
- Proton Pump Inhibitors
- Smoking Cessation Prescriptions
- Arthritis and Dermatology Drugs (Enbrel, Humira, Kineret)
- Orally Administered Cancer Drugs (Gleevec, Lupron, Revlimid, Sprycel, Sutent, Tarceva, Temodar, Thalomid, Xeloda)
- Human Growth Hormones (Genotropin, Humatrope, Norditropin, Nutropin, Omnitrope, Saizen, Serostim, Tev-Tropin)
- Multiple Sclerosis Drugs (Avonex, Betaseron, Copaxone, Rebif)
- Hepatitis Treatments (Baraclude, Copegus, Hepsera, Pegasys, Peg-Intron, Rebetol)
- Other specialty drugs, including, but not limited to:
  - Transplant Medications (Myfortic, Neoral, Prograf, Rapamune)
  - Pulmonary Hypertension Drugs (Adcirca, Flolan, Letairis, Revatio, Tyvaso, Ventavis)

For added convenience Jefferson pharmacies can mail prescriptions to your home upon request (shipping charges will apply)
