1. **What form of transportation did you use?** Walked
2. **What month did you take this elective?** Block 12 (September)
3. **What were your daily duties?**
   As consults came in, they would be divided among the students/ resident/ fellow - you would complete the consult and present it to the attending/team, taking a stab at the A&P. That patient would then be yours until the team signed off, so you continue to check up on them each day to see how they are progressing. (Limited notes and exams) We worked closely as a team w/ the fellow in charge of us as well as the Attending on service.
4. **How many hours per week were you on duty?** 8:30-5 Mon-Fri
5. **What was the call schedule? Were you able to pick your shifts or trade with peers?** No call
6. **Were there any specific requirements such as lectures, papers, examinations or presentations?**
   A few 8am and noon lectures during the week to attend. Nothing to present.
7. **Was there teaching by Attendings? Which Attending left the most impact on you?** Yes! We had Dr. DeSimone for 2 weeks and Dr. Squires for 2 weeks. Both were great at teaching on the floors during rounds. Dr. DeSimone would often sit down and teach from 4-5pm 3 or 4x a week.
8. **Were you able to attend interviews during your rotation?** N/A
9. **Did you have to make up for missing interview days?** N/A
10. **Did you get a letter of recommendation?** Yes
11. **How would you rate your overall experience?** Poor/Fair/Good/Very Good/ Excellent
    Excellent
12. **Would you recommend this elective to future students?** Definitely!
13. **Any other comments, suggestions or tips?** This was a very laid-back rotation, but still lots of learning. It mostly involved showing up for those hours and doing your work and the day would fly by. If you live close by, it was nice since some days you would just be waiting to hear if you got a consult, so you could go back home until they called you.

14. **OPTIONAL: Would you like to include your contact information?**
