Notice of Equal Opportunity

Thomas Jefferson University is committed to providing equal educational and employment opportunities for all persons without regard to race, color, national or ethnic origin, marital status, religion, sex, sexual orientation, gender identity, age, disability, veteran’s status or any other protected characteristic. The consideration of factors unrelated to a person’s ability, qualifications and performance is inconsistent with this policy. Any person having inquiries or complaints concerning Thomas Jefferson University’s compliance with Title VI, Title IX, the Age Discrimination Act of 1975, the Americans with Disabilities Act, or Section 504 of the Rehabilitation Act is directed to contact their Student Affairs Dean or Human Resources – Employee Relations, who have been designated by Thomas Jefferson University to coordinate the institution’s efforts to comply with the these laws. Any person may also contact the Assistant Secretary for Civil Rights, U.S. Department of Education, Washington, D.C. 20202, or the Director, U.S. Department of Education, Office for Civil Rights, Region Three, Philadelphia, Pennsylvania, regarding the University’s compliance with the equal opportunity laws.

Required Background Check

Students who are offered admission to Jefferson are required to pass a criminal background check and child abuse clearance. Some departments within the College, as well as some clinical sites may require students to be fingerprinted and/or drug tested. The Office of Admissions will provide you with the appropriate information to complete these requirements.

Clinical rotation and fieldwork sites that require a criminal background check, child abuse clearance and/or fingerprinting may deny a student’s participation in the clinical experience, rotation or fieldwork because of a felony or misdemeanor conviction or a record of child abuse. Clinical sites may also deny participation in clinical experiences for other reasons, including but not limited to failure of a required drug test, or inability to produce an appropriate health clearance. As participation in clinical experiences, rotations or fieldwork is a required part of the curriculum and a requirement for graduation, denial of participation by a clinical site may result in delay of graduation or the inability to graduate from the program.

Regardless of whether or not a student graduates from Jefferson, individuals who have been convicted of a felony or misdemeanor may be denied certification or licensure as a health professional. Information regarding individual eligibility may be obtained from the appropriate credentialing bodies.

Thomas Jefferson University reserves the right to amend any regulations, fees, conditions and courses described herein as circumstances may require without prior notice to persons who might thereby be affected. The provisions of this handbook are not and may not be regarded as contractual between the College and the students or its employees.

JEFFERSON COLLEGE OF HEALTH PROFESSIONS
MISSION STATEMENT
The Jefferson College of Health Professions is committed to educating health care professionals of the highest quality and ethical standards for contemporary practice in the global community. By promoting faculty excellence in teaching, research and service, we prepare caring professionals who are competent in the use of evidence based practice, critical in their thinking, committed to lifelong learning and prepared to be leaders in diverse health care settings. In keeping with the mission of the University and the future of health care delivery, the Jefferson College of Health Professions is committed to interdisciplinary education and technologies that draw upon the strengths of all disciplines.

DEPARTMENT OF RADIOLOGIC SCIENCES
MISSION STATEMENT
The Department of Radiologic Sciences provides excellence and leadership in all aspects of radiologic sciences, by teaching, undertaking research and providing exemplary clinical practice skills in the broad field covered by this discipline.

The mission of the Department of Radiologic Sciences is to provide a comprehensive education preparing students for entry-level practice into the radiologic and imaging sciences, as competent, caring professionals, cultivating professionalism and life-long learning. Through innovative technology and pedagogy, critical thinking and problem-solving skills are developed and interprofessional teamwork and communication are enhanced.

DEPARTMENT OF RADIOLOGIC SCIENCES
GOALS
The didactic, laboratory and clinical components of the curricula within the Department of Radiologic Sciences (DRS), Jefferson College of Health Professions (JCHP), Thomas Jefferson University (TJU), provide an environment for students to develop and master:

- Knowledge, insight and skills required to produce optimal diagnostic images or develop and deliver therapeutic treatment plans.
- Effective communication techniques required to interact successfully with both patients and other members of the health care team.
- Self-assessment skills required to evaluate correctly the quality and quantity of their work.
- Critical thinking and problem solving skills required to meet the challenges of the dynamic healthcare environment.
- Values for commitment to life-long learning, public education and involvement in their professional organizations.
NUCLEAR MEDICINE TECHNOLOGY PROGRAM

GOALS
The didactic, laboratory and clinical education experience for the Nuclear Medicine Technology Program in the Department of Radiologic Sciences will provide a learning environment for students to develop and master:

- Knowledge, insight and skills required to produce optimal diagnostic images.
- Effective communication techniques required to interact successfully with both patients and other members of the health care team.
- Self-assessment skills required to evaluate correctly the quality and quantity of their work.
- Critical thinking and problem solving skills required to meet the challenges of the dynamic healthcare environment.
- Values for commitment to life-long learning, public education and involvement in their professional organizations.

OBJECTIVES
The objectives of the program are to develop a Nuclear Medicine Technologist who will be able to:

- Understand and practice the art and science of nuclear medicine technology.
- Produce images providing optimal information obtained with appropriate technique.
- Perform, under the supervision of an authorized user, the duties of the technologist in therapeutic procedures.
- Apply appropriate protection practices toward the patient, self, the health care team and the public.
- Apply critical thinking and problem solving in making decisions about imaging exams.
- Contribute to the physical and psychological comfort of the patient under the guidelines of the Patients’ Bill of Rights.
- Adhere to the SNMMI-TS and ASRT Code of Ethics in professional practice.
- Assume responsibility for professional development.
- Demonstrate communication ability by establishing rapport with patient and healthcare team.
- Work effectively as part of the nuclear medicine team.
THE HANDBOOK

This Academic Policies and Clinical Education Handbook serves as a guide for students enrolled in the Department of Radiologic Sciences, Jefferson College of Health Professions, Thomas Jefferson University.

A Thomas Jefferson University student is required to uphold a high standard of academic and nonacademic conduct. That standard is presented in this document and will be upheld by the Department of Radiologic Sciences. Academic and nonacademic misconduct at Thomas Jefferson University is subject to disciplinary action.

This handbook is given to matriculating students during orientation. The Department will obtain documentation of the receipt and review of the handbook.

Each student will be responsible for maintaining his/her knowledge of the information contained in the Academic Policies and Clinical Education Handbook, as well as the Jefferson College of Health Professions Student Handbook.

The Jefferson College of Health Profession Handbook is available online at: www.jefferson.edu/handbook
NATIONAL CERTIFICATION EXAMINATION
Graduates of the Multicompetency\(^1\) and Advanced Placement Programs are eligible to take the associated certification examinations of the American Registry of Radiologic Technologists (ARRT), American Registry of Diagnostic Medical Sonographers (ARDMS), Cardiovascular Credentialing International (CCI), Medical Dosimetrist Certification Board (MDCB), and Nuclear Medicine Technology Certification Board (NMTCB), as applicable. Students who pass these examinations receive national certification.

PROGRAM ACCREDITATION
The educational programs of the Department are approved by the University administration. All programs are programmatically accredited by their respective accreditation body (e.g., JRCERT, JRCNMT, and JRCDMS). The Computed Tomography and Invasive Cardiovascular Technology programs are covered under the University’s accreditation by Middle States Commission on Accreditation.

PROGRAM COMPLIANCE
If a student feels the program is not in compliance with the accreditation standards, a complaint must be submitted in writing to the Program Director with documentation for the complaint. The Department Chair, Program Director, and Clinical Coordinator will review the complaint and documentation and respond to the student within three (3) business days of receiving the complaint. If the student is not satisfied with the response, he/she has the right to contact the accreditation body\(^2\).

1. All multicompetency students EXCEPT for sonography are not eligible for the certification examinations until they have successfully completed both years of the program.
2. Students in CT and ICVT would contact the Dean of Jefferson College of Health Professions
THOMAS JEFFERSON UNIVERSITY AND
JEFFERSON COLLEGE OF HEALTH PROFESSIONS
POLICIES AND PROCEDURES
While we have attempted to provide you with a comprehensive departmental handbook, it does not stand alone.

All Thomas Jefferson University (TJU) and Jefferson College of Health Professions (JCHP) policies, including the Academic Policies and Procedures, Conduct Policies and Procedures, and Emergency Policies and Procedures, along with information on various University services, can be found at www.jefferson.edu/handbook.

The JCHP Student Handbook can also be accessed from the JCHP home webpage (http://www.jefferson.edu/university/health_professions.html).

Please review all of these resources, as they will help guide you through a successful student experience at Thomas Jefferson University.
POLICIES ON STUDENT PROGRESSION

COURSE REQUIREMENTS
1. Prerequisites for courses outlined in the curriculum must be met in order to follow the necessary educational sequence.
2. Students are responsible for accessing courses through Blackboard Learn (Jefferson.blackboard.com) and downloading all course syllabi, handouts and assignments for each course every semester.
3. Students are responsible for completing course evaluations for each of their courses at the end of the semester. A link will be provided to the students at the end of the semester.
4. Students are responsible for checking their Jefferson e-mail accounts daily.
5. Students must complete the Health Insurance Portability and Accountability Act (HIPAA) and Safety Modules prior to matriculation.

POLICIES ON STUDENT PROGRESSION IN THE RADIOLOGIC SCIENCES MAJOR
1. A student who earns one course grade of C- or below in the Radiologic Sciences curriculum in any academic year will be placed on departmental academic probation and will be required to meet with his/her assigned faculty advisor to monitor academic progress.
2. A student who earns two or more course grades of C- or below in the Radiologic Sciences curriculum in any academic year will be dismissed from the program in which he/she is currently enrolled. He/She will be subject to dismissal from the Department of Radiologic Sciences.
3. A student who earns a course grade of F in any Radiologic Sciences curriculum will be dismissed from the program modality in which he/she is currently enrolled. He/She will be subject to dismissal from the Department of Radiologic Sciences.
4. A multicompetency student who has been placed on departmental academic probation during his/her junior academic year, but has successfully completed his/her junior academic year, will be taken off departmental academic probation at the beginning of his/her senior academic year.
5. A student who does not maintain a minimum 2.00 cumulative grade point average (GPA) will be placed on JCHP academic probation for one semester. If the student is enrolled in courses totaling fewer than 12 credits during the subsequent semester, the probationary period will be extended to two semesters. At the end of the probationary period:
   a. The student achieves the minimum cumulative GPA and is reinstated in good standing, or
   b. The student fails to achieve the minimum cumulative GPA at the end of the probationary period and is dismissed from JCHP for academic underachievement, or
   c. In extraordinary cases, where the student has made significant progress toward achieving the minimum cumulative GPA, the Department Chairperson may recommend granting one additional probationary semester. If, at the conclusion of the extended probationary period, the cumulative GPA is still below the
minimum 2.00, the student is dismissed for academic underachievement.

6. A student who is dismissed from the Department of Radiologic Sciences or JCHP due to unsatisfactory academic performance may, within 1 year of the dismissal, apply for readmission by submitting a written request directly to the Department Chairperson. If longer than 1 year has elapsed since dismissal, application for readmission must made through the Office of Admissions. Please refer to the JCHP Student Handbook for the JCHP Readmission Procedure.

7. A senior year multicompetency student who is dismissed from the Department of Radiologic Sciences due to unsatisfactory academic performance in his/her senior year may be given the option of applying for enrollment in a baccalaureate degree program in the Department of Professional and Continuing Studies.

8. Incomplete grades for a Radiologic Sciences course can be assigned only in the case of extenuating circumstances. These circumstances must be reviewed by the faculty prior to the issuance of an “Incomplete” grade. In all cases, an “Incomplete” grade is assigned only when the work already done has been of a quality acceptable to the instructor.

In addition to Departmental academic progression standards, students must also meet minimum required academic standards within Jefferson College of Health Professions. For Academic Probation and Dismissal standards for the Jefferson College of Health Professions, please refer to the JCHP Student Handbook at http://www.jefferson.edu/handbook.

Every student is required to meet with his or her faculty advisor at least once during each semester.
COMPETENCY-BASED CLINICAL EDUCATION
COMPETENCY-BASED CLINICAL EDUCATION

Competency-based clinical education has been established for the students enrolled in the Department of Radiologic Sciences programs. It is designed to permit accurate assessment of the knowledge, skills, and abilities of students in the clinical education component of the program. Evaluation of students’ clinical competencies is completed by registered technologists under the direction of the Clinical Affiliate Supervisor.

All students must attend a minimum number of clinical training hours (see clinical syllabus). All students must complete clinical competencies in accordance with the requirement of their certification body (e.g., ARRT), as applicable.

CLINICAL EDUCATION ELIGIBILITY

To be assigned to a Clinical Affiliate site, the student must meet the following requirements or obligations:

• Be a student in good academic standing in the Department of Radiologic Sciences.
• Maintain a cumulative grade point average of 2.00 or higher.
• Provide and maintain proof of certification in adult, child and infant cardiopulmonary resuscitation (BLS/CPR/AED for Healthcare Provider).
• Provide a current health certificate from a licensed physician indicating that the student is in good health. The document should include a description of any physical disability that may require monitoring during the student’s course of study. If a disability interrupts the student’s course of study, it should be discussed with the Clinical Coordinator.
• All immunization requirements must be completed prior to commencing or resuming clinical courses. Failure to meet these health requirements will result in the delay of clinical practical or the failure of clinical courses.
• Be in compliance with the University requirements for influenza vaccination.
• Meet program specific technical standards (Appendix A).
• Use personal or public transportation to clinical sites. Commuting time and costs are not determining factors for clinical assignments. These time and cost factors are borne solely by the student.
• Additional requirements may be needed.

Students not in compliance are not permitted to attend classes or clinical.

CRIMINAL BACKGROUND AND CHILD ABUSE CHECKS AND DRUG TESTING

Individuals who have been convicted of a felony or misdemeanor may be denied certification or licensure as a health professional. Information regarding individual eligibility may be obtained from the appropriate credentialing bodies. Clinical rotation and fieldwork sites may require a criminal background check and/or child abuse check in order to permit participation in the clinical experience, rotation or fieldwork. Participation in clinical experiences, rotations or fieldwork is a required part of the curriculum and a
requirement for graduation. Clinical rotation and fieldwork sites may deny a student's participation in the clinical experience, rotation or fieldwork because of felony or misdemeanor conviction, failure of a required drug test, or inability to produce an appropriate health clearance, which would result in delayed graduation or in the inability to graduate from the program.

**CLINICAL PRACTICES AND POLICIES**

1. Attendance at clinical practical is mandatory.
2. A student who does not demonstrate safe clinical practice will be in violation of clinical practices and policies.
3. A student who does not demonstrate professional behavior and professional practice is subject to review by the faculty.
4. Safe clinical or professional practice is defined as:
   a. Adheres to the *Patients’ Bill of Rights* (Appendix B).
   b. Performs clinical duties consistent with the professional Code of Ethics (Appendix C).
   c. Receives passing grades on clinical evaluations as evaluated by qualified personnel.
      (See course syllabus)
   d. Adheres to the code of behavior/conduct outlined in the JCHP and Department of Radiologic Sciences handbooks.
   e. Adheres to all clinical practices and policies of the clinical site and JCHP and Department of Radiologic Sciences.
   f. Adheres to departmental radiation protection and monitoring practices (Appendix D).

**VIOLATIONS OF CLINICAL PRACTICES AND POLICIES**

Violations of Clinical Practices and Policies will typically be addressed through progressive discipline, as follows:

- First violation – written warning and counseling by the Program Director and Clinical Supervisor.
- Second violation – possible suspension or dismissal.
- Third violation – dismissal from the Department.

Depending on the particular circumstances, one or more progressive disciplinary steps may be skipped in instances of particularly serious violations of policies and/or practices, and some egregious violations may result in immediate dismissal from the Department.

**POLICY GOVERNING CLINICAL EDUCATION SCHEDULING**

The purpose of the clinical assignment is to correlate didactic knowledge with practical skills.

The total number of students assigned to any clinical site shall be determined by the Department of Radiologic Sciences and approved by program accreditation bodies.
The student is subject to all rules and regulations of the clinical site. The clinical education center reserves the right to suspend or terminate from the clinical site a student who does not adhere to established policies of the program or the clinical site. A student who does not maintain appropriate behavior may be suspended or dismissed immediately. (Refer to the section entitled "Responsibilities of the Student").

If a student is suspended or dismissed from a clinical site, the Department Chair, Program Director and Clinical Coordinator will review the circumstances for this action. All parties are encouraged to address the issue promptly in writing (within five (5) business days whenever possible) so that resolution of grievance should require no more than three (3) weeks. If the decision to dismiss is upheld, the clinical dismissal will result in a final grade of “F”. Students who have reason to believe that the grade has been inappropriately assigned may request a review of the grade in accordance with the provisions of the Grade Appeal Protocol, which is published in the JCHP Student Handbook. For dismissal due to Unsafe Clinical Performance, students will follow the Policy on Dismissal for Unsafe Clinical Performance, which is published in the JCHP Student Handbook. The JCHP Student Handbook may be found at this link: www.jefferson.edu/handbook

**CLINICAL SITE ASSIGNMENT**

The Program Director and Clinical Coordinator determine student schedules and assignments at clinical education centers. Assignments at the clinical sites are intended to provide the student with a comprehensive clinical education as deemed appropriate by the faculty, and serves to correlate didactic knowledge with practical skills. Students are not guaranteed a specific clinical site, however, student input is considered. Should a student be dismissed from his/her clinical site, the department does not guarantee replacement at an alternate site.

Student's clinical assignments will be based on:
- Student's experience and competency level.
- Clinical education needs, directed toward reaching the highest level of competency in diagnostic imaging.

Any student requesting changes in the clinical schedule must submit written justification for the change to the appropriate Program Director. A decision will be made based on the student's educational needs and site availability.

**RESPONSIBILITIES OF THE CLINICAL SUPERVISOR**

The Clinical Supervisor is available to students whenever they are assigned to a clinical setting. Responsibilities include:
- Providing appropriate clinical supervision.
- Student clinical evaluation.
- Providing orientation to the clinical department.
- Providing feedback to the Program Director and Clinical Coordinator.
CLINICAL SUPERVISION

Until a student achieves and documents competency in any given procedure, that procedure must be carried out under the direct supervision of a registered nuclear medicine technologist.

Direct supervision:
• A registered nuclear medicine technologist reviews the request for examination in relation to the student’s achievement;
• A registered nuclear medicine technologist evaluates the condition of the patient in relation to the student’s knowledge;
• A registered nuclear medicine technologist is present during the conduct of the examination; and
• A registered nuclear medicine technologist reviews and approves the images.

After demonstration of competency in a given procedure, students may perform that procedure with indirect supervision.

Indirect supervision:
Supervision is provided by a registered nuclear medicine technologist immediately available to assist the student, regardless of the level of student achievement.
“Immediately available” is interpreted as the presence of a registered nuclear medicine technologist adjacent to the room or location where a nuclear medicine procedure is being performed.

RESPONSIBILITIES OF THE PROGRAM DIRECTOR AND CLINICAL COORDINATOR
The Department of Radiologic Sciences Program Director and Clinical Coordinator coordinate the daily operations of clinical education. Duties include, but are not limited to:
• Providing clinical education centers.
• Mentoring students.
• Supervising students.
• Advising students.
• Providing guidance to clinical instructors.
• Reviewing program policies and procedures with clinical affiliate supervisor/instructors.

RESPONSIBILITIES OF THE STUDENT
The student is responsible for:
• Displaying professional appearance in compliance with the dress code policy.
• Establishing harmonious working relationships and earning the respect of the radiologic sciences personnel through a professional and dignified posture and attitude.
• Using all equipment and materials responsibly and safely.
• Embodying the highest standards of civility, honesty, and integrity.
• Respecting and protecting the privacy, dignity, and individuality of others.
• Observing and assisting the clinical staff.
• Attending and participating in all scheduled clinical activities.
• Consulting with clinical site supervisors and/or departmental faculty for help with problems.
• Participating in the development of an individualized clinical education plan.
• Maintaining an accurate record of clinical examinations/competencies.
• Recording the number and types of evaluations required during each academic semester.
• Striving to broaden his/her knowledge and background on clinical subject matter by reading professional literature and attending conferences and seminars.
• Incurring all travel costs and expenses.
• Meeting with advisor at least once per semester.
CLINICAL POLICIES
DEPARTMENT POLICY ON CONDUCT
Students must comply with the rules and regulations of the Department of Radiologic Sciences. Deviation constitutes misconduct. This includes, but is not limited to:

- Sleeping during a clinical assignment.
- Failure to actively participate in clinical education.
- Leaving a clinical assignment or room/area assignment without qualified staff’s permission.
- Failure to notify the Clinical Supervisor and the Program Director/Clinical Coordinator of absence or lateness.
- Using a cell phone during clinical hours.
- Using the hospital computer for any reason EXCEPT hospital business.
- Violation of any duly established rules or regulations.

FAMILY/FRIENDS WORKING AT CLINICAL SITE POLICY
It may be deemed a conflict of interest for a student to be supervised or evaluated by family members or friends employed at his/her clinical site. If this situation arises, the student should inform his/her Program Director, so that alternative arrangements can be considered.

FAMILY/FRIENDS CLASSROOM, LABORATORY AND CLINICAL POLICY

At the Clinical Affiliate:
- Family and friends should be discouraged from visiting the clinical site. In particular, unsupervised children are not permitted.
- Family and friends must wait in a public area, and are not permitted in scanning or treatment rooms.
- It is not acceptable for students to entertain their family and friends and neglect their professional duties.
- Students may not ask clinical affiliate staff to baby-sit for them.
- TJU’s liability insurance does not extend to students’ family and friends.

In the RS Department:
- Students should discourage their family and friends from visiting the RS department while they (the students) are in class.
- Family and friends are not permitted to attend lectures or laboratory sessions.
- Unaccompanied children are not permitted in the RS department.
- Students may not ask faculty or administrative staff to baby-sit for them.
- TJU’s liability insurance does not extend to students’ family and friends.

In the Radiologic Science (RS) laboratories:
- Only Radiologic Science students with proper Jefferson ID are permitted in the laboratory.
- The students are not permitted to bring family members or friends in the
laboratory at any time.

- Scanning or performing any procedures on family members or friends is not permitted.
- Other Jefferson students or employees who are not part of the Radiologic Sciences department are not permitted in the RS laboratory unless they have signed a waiver to be used as a student volunteer.
- TJU’s liability insurance does not extend to students’ family and friends.
- The students should inform the security guard on 1st floor Edison, both when entering and leaving the laboratory, outside of the regular assigned hours.

Failure to comply with the policy may result in disciplinary action up to and including dismissal from the program.

**DRESS CODE POLICY**

**Uniforms:**

- The dress code for students enrolled in Radiologic Sciences programs consists of navy blue hospital scrubs (tops and bottoms) with TJU patch sewn on the right sleeve. These scrubs are available and may be purchased directly through the University Bookstore. A Jefferson ID badge needs to be worn at all times during clinical rotations.
- A long, white lab coat with the Jefferson patch on the right shoulder must be worn.
- A white or navy blue, mock turtleneck may also be worn under the scrub top in the fall and winter seasons.
- Name tags must be visible to patient and staff and worn at all times.
- Solid white or black leather footwear. Students are responsible for keeping shoes neat, clean, and polished. Shoestrings should also be kept clean and properly tied.

**Appearance:**

- Students are required to practice good personal hygiene and present a professional appearance at all times.
- Appropriate and clean attire is required during all clinical and didactic sessions.
- Unacceptable apparel includes: short skirts/shorts, torn/ripped garments, low-cut tops, lewd and/or suggestive slogans on any clothing.
- Keep hair, mustaches and beards neatly trimmed. Long hair must be tied back at clinical.
- Fingernails:
  - No artificial nails.
  - No nail polish.
  - Nail length must be less than ¼ inches.
- Jewelry:
  - Keep jewelry to a minimum.
  - Earrings should be of the small post type (no hoops).
- Body piercings:
• Any body piercings besides the ears should not be evident at clinical site.
  • Tongue rings are unacceptable and are not allowed to be worn.

• Makeup:
  • Makeup, if used, must be conservative.
  • No perfumes, colognes, lotions or powders are to be worn at clinical.

• Tattoos:
  • All visible tattoos must be covered.

• Chewing gum is not permitted.

Students are required to wear identification and radiation badges supplied by Thomas Jefferson University, and Clinical Affiliate Sites if provided, at all times.

Non-compliance:
Any student not complying with the dress code policy will be removed from the clinical site. Any clinical time missed due to dress code violation will be made up by the student at a later date. The Program Director/Clinical Coordinator in cooperation with the Clinical Supervisor will determine make-up time.

STUDENT WORK POLICY
If a student is employed at any clinical site, he/she must abide by the following policies:
• Students must notify Program officials that they are working at the clinical site
• Students are not permitted to work during scheduled clinical hours.
• Students may not wear student uniforms or Jefferson ID.
• Students may not accrue competencies during non-clinical hours.
• Students may not apply work time to make-up time.
• Students are not covered by Jefferson liability insurance during non-clinical hours.

CELL PHONE/PAGER POLICY
Cell phones and pagers must be placed on vibrate during lectures and laboratory sessions. Instructors will not tolerate interruptions from these devices and may ask the student to leave the classroom.
Students may not carry cell phones or beepers with them during clinical hours. These devices must be placed in lockers. Any student in violation of this policy will be asked to leave his/her clinical site and will be marked absent for that day.
In limited circumstances demanding immediate personal phone use, students should seek approval from their supervisor for any incoming communication, whether via call or text message, to ensure they are sanctioned.

COMPUTER POLICY
Students may not use computers for personal business during clinical hours. Personal business includes (but is not limited to) Internet surfing, shopping, emailing and instant-messaging.

Any student in violation of this policy will be asked to leave his/her clinical site and will be marked absent.
VENIPUNCTURE POLICY
The ARRT clinical competency requirements include performance of venipuncture for injection of contrast agents and radiopharmaceuticals.
In order to participate in the performance of venipuncture on patients, students must:
• Have completed all immunizations as required by JSHP.
• Have current CPR certification, as required by the Department of Radiologic Sciences.
• Have health insurance, as required by JCHP.
• Have completed a venipuncture certification course, as required by the Department of Radiologic Sciences.
• Attend and complete institutional venipuncture training, as required by clinical sites.

HEALTH INFORMATION CONFIDENTIALITY POLICY:
HEALTH INSURANCE PORTABILITY AND ACCOUNTABILITY ACT (HIPAA)
Students must maintain strict confidentiality of all health information of patients at clinical affiliate sites during and after the course of their clinical rotations. Students may neither use nor disclose health information of patients to which they have access, other than as expressly authorized by the clinical affiliate. Students may not record any patient-identifiable information on their personal documents (e.g. clinical logs). Students must be familiar with and adhere to their clinical site HIPAA policy.

PREGNANCY POLICY
If a student becomes pregnant during a component of the program, she may voluntarily inform the Program Director, in writing, of her pregnancy.

Option 1:
The student may continue in the program if she chooses, without modifications to any component of the program.

Option 2:
The student may take a leave of absence from clinical education, but continue her didactic studies. Clinical assignments will be completed when the student returns.

Option 3:
The student may withdraw from the program and reapply in accordance with JCHP policies.

Option 4:
The student, in writing, may withdraw her declaration of pregnancy at any time and/or for any reason.

Due to the need for special radiation protection education, counseling by the Radiation Safety Officer (RSO) is available.
INCIDENT REPORTS AT THE CLINICAL SITE POLICY

If a student is injured or involved in an incident during a clinical rotation, he/she must:
1. Report immediately to his/her supervisor and follow departmental protocol.
2. Report immediately to the Program Director or Clinical Coordinator.
3. Present a note to the Program Director or Clinical Coordinator from the Emergency Room Physician, University Health Physician, or family physician stating the date the student may resume normal duties.
4. Student must report to University Health Services as soon as possible (215-955-6835).

If a patient is injured while in the student's care, the student must:
1. Make sure that the patient is safe.
2. Report the incident immediately to the supervisor and follow departmental protocol.
3. Report the incident immediately to the Program Director or Clinical Coordinator.

INFECTIOUS DISEASES POLICY

Should a student be diagnosed as having an infectious disease, he/she must report such diagnosis to the Program Director or Clinical Coordinator and the Clinical Supervisor. The student may be asked to leave clinical until cleared by his/her physician. The student must present a physician’s note to the Program Director or Clinical Coordinator stating that the student may resume normal duties.
ATTENDANCE REGULATIONS
DIDACTIC/LABORATORY INSTRUCTION
Each course syllabus details the attendance policy.

CLINICAL ATTENDANCE RECORDS
Attendance sheets provided by the Department are used for documenting clinical hours. Each student must personally sign in and out. Time not documented must be made up. Under no circumstances is it permissible to sign in or out for another student. Any student found guilty of such an offense is subject to dismissal.

CLINICAL EDUCATION HOURS
Total clinical assignments will not exceed 40 hours per week. Assignments on any one day will not exceed 8 hours, unless otherwise requested by the student and approved by the Program Director or Clinical Coordinator in conjunction with the Clinical Supervisor, or if patient care responsibilities dictate otherwise. No student will be permitted to leave a patient during the course of an examination, even if such completion requires remaining on duty beyond the end of the shift.

Students will be assigned a lunch period each day, which they are required to take. The lunch break will be commensurate with the practice of the department and area/rotation assignment. The lunch break may not be used to make-up or accrue time. Clinical Supervisors may re-schedule students (within an assigned eight hours) to provide complete exposure to the unique learning opportunities in radiologic sciences. Students will participate in designated procedures during their clinical assignments under the guidance of a supervising technologist in the areas to which they are assigned.

PERSONAL DAYS
Students are allocated one personal day each semester. It is not accruable nor is it transferable. A personal time request form must be submitted to the Program Director. Students may not accrue additional personal any time during the year.

ABSENCE POLICY
Attendance is required for all clinical practicum sessions. If a student will be absent from a clinical assignment, he or she must call both the Clinical Supervisor and Program Director prior to the start of the shift. Three or more consecutive absences require a doctor’s note. Extenuating circumstances will be dealt with on an individual basis.

If an emergency arises requiring an early departure from the clinical site, the student must notify both the Clinical Supervisor and the Program Director. It is the responsibility of the student to make these calls. Absences must be made up at the discretion of the faculty.
**PUNCTUALITY**

Any student who is not in his/her clinical area at the assigned time will be considered late. Three (3) latenesses in one semester will be counted as one day’s absence. Habitual lateness could lead to dismissal from the program.

It is the policy of the Department of Radiologic Sciences that any student who is going to be late must notify both the Clinical Supervisor and the Program Director prior to the start of his/her assigned time. All lost time due to lateness from the clinical area must be made up by the student. Failure to abide by these policies could lead to dismissal from the program.

A student will be advised in writing concerning his/her habitual lateness or violation of the Department of Radiologic Sciences lateness policies by the Program Director. Disciplinary actions, including suspensions from the clinical site or dismissal from the program, may be taken against students who persist in habitual lateness or violations of the Departmental of Radiologic Sciences lateness policies, after previously having been counseled in writing by the Program Director at an Advisement Conference.

**MAKE-UP TIME**

Arrangements must be made with the Clinical Affiliate Supervisor and approved by the Program Director. The make-up time form is signed upon fulfillment of the time missed. The form will be submitted to the Program Director. All clinical absences must be made up at the Clinical Affiliate where the time was missed, consistent with the room assignments in effect when the absence occurred. The lunch break may not be used to make-up or accrue time.

**POLICY CONCERNING DEATH IN THE FAMILY**

Upon notification to the Program Director, students will be allowed a maximum of three (3) days of leave of absence for death in the immediate family. Immediate family members include parents, grandparents, spouse, brother, sister or child. Leaves of absence requested because of the death of someone other than an immediate family member may be granted by special permission.

**POLICY CONCERNING HOSPITAL JOB ACTIONS OR STRIKES**

Whenever a strike or job action occurs at an assigned clinical site, the student must leave the assignment immediately and report to the Program Director or Clinical Coordinator for further directions. At no time should a student attempt to cross a picket line to enter a clinical site.

**POLICY CONCERNING JURY DUTY**

Being selected for jury duty is a civic responsibility in which the Department encourages students to participate. Please be advised that JCHP cannot intervene on the student's behalf should a student be summoned for jury duty.
STUDENT ACTIVITIES
STUDENT ACTIVITIES

Students are encouraged to participate in campus activities, e.g., orientation programs, recruitment functions, social and cultural events, interprofessional activities and Class Night. They have the opportunity to represent the students’ viewpoints on Department, College and University committees. The University and Thomas Jefferson University Hospital sponsor many volunteer and mentoring programs. Professional organizations, Jefferson Alumni Association and the School sponsor many programs that focus on career and professional development.

HONORS AND AWARDS

Students are eligible for:

- JRCERT awards for clinical excellence.
- Departmental awards.

Awards are presented on class day.

PROFESSIONAL SOCIETIES AND ORGANIZATIONS

Students are strongly encouraged to participate in professional activities and to seek memberships in national, state and local societies. These organizations sponsor competitions for students and several offer scholarships and educational grants.

- American Society of Allied Health Professions (ASAHP)
- American Society of Radiologic Technologists (ASRT)
- Delaware Valley Society of Nuclear Medicine Technology (DVSNMT)
- Association of Collegiate Educators in Radiologic Technology (ACERT)
- Pennsylvania Radiological Society (PRS)
- Philadelphia Society of Radiologic Technologists (PhilaSRT)
- Society of Nuclear Medicine and Molecular Imaging (SNMMI)

HONOR SOCIETIES

Alpha Eta Society:

- Honor society for health professionals
- [http://www.alphaeta.net](http://www.alphaeta.net)

Lambda Nu Society:

- Honor society for radiologic and imaging science professionals
- [http://www.lambdanu.org](http://www.lambdanu.org)
APPENDIX A

Technical standards for the nuclear medicine program

In order to complete the Nuclear Medicine Technology program, a student must meet the following technical standards, which are based on recommendations by the ASRT.

1. Sufficient visual acuity to accurately prepare and administer radiopharmaceuticals, and other medications, and to monitor imaging equipment as well as provide the necessary patient assessment and care.
2. Sufficient auditory perception to receive verbal communication from patients and members of the healthcare team, and to assess the health needs of people through monitoring devices such as intercom systems, blood pressure gauges, and fire alarms.
3. Sufficient gross and fine motor coordination to respond promptly and to implement skills related to the performance of NM, such as positioning, transporting and imaging patients. NM technologists must be able to lift and transport lead blocks or radionuclide generators weighing up to 50 pounds. In addition, NM technologists must perform venipuncture on a regular basis.
4. Sufficient communication skills (verbal, reading, writing) to interact with individuals and to communicate their needs promptly and effectively, as may be necessary in the patient’s interest.
5. Sufficient intellectual and emotional function to plan and implement patient care.

Examples of specific technical standards the NM student must be able to meet are:

- Lift, transfer and/or move patients from wheelchair/stretcher to imaging table
- Lift, move, reach or push NM equipment
- Manual dexterity and ability to bend/stretch
- Distinguish colors and shades of gray
- Demonstrate effective interpersonal skills, including patient instruction
- Read and extract information from the medical chart or patient requisition
- Explain the clinical study verbally and/or in writing
- Physical and mental abilities to handle moderate and frequent exposure to infectious agents (blood, urine) and moderate exposure to ionizing radiation.
APPENDIX B
Patients’ Bill of Rights

We consider you a partner in your hospital care. When you are well informed, participate in treatment decisions, and communicate openly with your doctor and other health professionals, you help make your care as effective as possible. This hospital encourages respect for the personal preferences and values of each individual.

While you are a patient in the hospital, your rights include the following:

- You have the right to considerate and respectful care.
- You have the right to be well informed about your illness, possible treatments, and likely outcome and to discuss this information with your doctor. You have the right to know the names and roles of people treating you.
- You have the right to consent to or refuse a treatment, as permitted by law, throughout your hospital. If you refuse a recommended treatment, you will receive other needed and available care.
- You have the right to have an advance directive, such as a living will or health care proxy. These documents express your choices about your future care or name someone to decide if you cannot speak for yourself. If you have a written advance directive, you should provide a copy to your family, and your doctor.
- You have the right to privacy. The hospital, you doctor, and others caring for you will protect your privacy as much as possible.
- You have the right to expect that treatment records are confidential unless you have given permission to release information or reporting is required or permitted by law. When the hospital releases records to others, such as insurers, it emphasizes that the records are confidential.
- You have the right to review your medical records and to have the information explained except when restricted by law.
- You have the right to expect that the hospital will give you necessary health hospital services to the best of its ability. Treatment, referral, or transfer may be recommended. If transfer is recommended or requested, you will be informed of risks, benefits, and alternatives. You will not be transferred until the other institution agrees to accept you.
- You have the right to know if this hospital has relationships with outside parties that may influence you treatment and care. These relationships may be with educational institutions, other health care providers, or insurers.
- You have the right to consent or decline to take part in research affecting your care. If you choose not to take part, you will receive the most effective care the hospital otherwise provides.
- You have the right to be told of realistic care alternatives when hospital care is no longer appropriate.
- You have the right to know about hospital rules that affect you and your treatment and about charges and payment methods. You have the right to know about hospital
resources, such as patient representatives or ethic committees that can help you resolve problems and questions about your hospital stay and care.

- You have responsibilities as a patient. You are responsible for providing information about your health, including past illnesses, hospital stays, and use of medicine. You are responsible for asking questions when you do not understand information or instructions. If you believe you can't follow through with your treatment, you are responsible for telling your doctor.

- This hospital works to provide care efficiently and fairly to all patients and the community. You and your visitors are responsible for being considerate of the needs of other patients, staff, and the hospital. You are responsible for providing information for insurance and for working with the hospital to arrange payment, when needed.

- Your health depends not just on your hospital care but, in the long term, on the decisions you make in your daily life. You are responsible for recognizing the effect of life-style on your personal health.

- A hospital serves many purposes. Hospitals work to improve people's health; treat people with injury and disease; educate doctors, health professionals, patients, and community members; and improve understanding of health and disease. In carrying out these activities, this institution works to respect your values and dignity.
APPENDIX C
ASRT CODE OF ETHICS

1. The radiologic technologist conducts himself/herself in a professional manner, responds to patient needs and supports colleagues and associates in providing quality patient care.

2. The radiologic technologist acts to advance the principal objective of the profession to provide services to humanity with full respect for the dignity of mankind.

3. The radiologic technologist delivers patient care and service unrestricted by concerns of personal attributes or the nature of the disease or illness, and without discrimination, on the basis of sex, race, creed, religion or socioeconomic status.

4. The radiologic technologist practices technology founded upon theoretical knowledge and concepts, uses equipment and accessories consistent with the purpose for which they have been designed, and employs procedures and techniques appropriately.

5. The radiologic technologist assesses situations, exercises care, discretion and judgment, assumes responsibility for professional decisions; and acts in the best interest of the patient.

6. The radiologic technologist acts as an agent through observation and communication to obtain pertinent information for the physician to aid in the diagnosis and treatment of the patient, and recognizes the interpretation and diagnosis are outside the scope of practice for the profession.

7. The radiologic technologist uses equipment and accessories, employs techniques and procedures, performs services in accordance with an accepted standard of practice and demonstrates expertise in minimizing the radiation exposure to the patient, self and other members of the health care team.

8. The radiologic technologist practices ethical conduct appropriate to the profession and protects the patient’s right to quality radiologic technology care.

9. The radiologic technologist respects confidences entrusted in the course of professional practice respects the patient’s right to privacy and reveals confidential information only as required by law or to protect the welfare of the individual or the community.

10. The radiologic technologist continually strives to improve knowledge and skills by participating in educational and professional activities, sharing knowledge with colleagues and investigating new and innovative aspects of professional practice.

SNMMI-TS CODE OF ETHICS

1. The Nuclear Medicine Technologist will provide services with compassion and respect for the dignity of the individual and with the intent to provide the highest quality of patient care.

2. The Nuclear Medicine Technologist will provide care without discrimination regarding the nature of the illness or disease, gender, race, religion, sexual preference or socioeconomic status of the patient.

3. The Nuclear Medicine Technologist will maintain strict patient confidentiality in accordance with state and federal regulations.

4. The Nuclear Medicine Technologist will comply with the laws, regulations, and policies governing the practice of nuclear medicine.

5. The Nuclear Medicine Technologist will continually strive to improve his/her knowledge and technical skills.

6. The Nuclear Medicine Technologist will not engage in fraud, deception, or criminal activities.

7. The Nuclear Medicine Technologist will be an advocate for his/her profession.

Revised and adopted by the Society of Nuclear Medicine Technologist Section, June 2004.
APPENDIX D

TJUH DEPARTMENT POLICIES & PROCEDURES

DEPARTMENT NAME: Radiation Safety

Policy No: RSO-053
Effective Date: 11/02/2000
Revision Date: 08/07/2014

Category: Operations - Programmatic
Title: Radiation Dosimeter Use Policy
Owner: John C. Keklak
Contributors/Contributing Departments:

PURPOSE
To assess employee occupational radiation dose from ionizing radiation sources external to the body.

POLICY
Radiation dosimeters ("individual monitoring devices" as defined in 10 CFR 20.1203) are to be issued for the purpose of assessing occupational radiation dose as follows:

1. Radiation dosimeters are to be issued to anyone (employee/student/volunteer) whose assigned duties involve potential exposure to ionizing radiation and whom the Radiation Safety Officer has determined meets the requirements for individual monitoring devices as described in applicable federal or state regulations.

2. Radiation dosimeters may also be required for individuals in specific work areas or performing designated tasks, even if not required by state or federal regulations.

3. Radiation dosimeters may be offered as an option to individuals in areas where use of individual monitoring devices is not required by regulations, but where employees may have concerns about their level of radiation exposure. Optional use must be approved by the appropriate Department and/or Division Head and the RSO.

4. Radiation dosimeter readings are routinely reviewed by Radiation Safety Staff and appropriate follow-up action taken as may be indicated by the results.

Date: 07/31/2012
Confidential and Proprietary to Thomas Jefferson University Hospitals, Inc.
**Definition:**
For the purposes of this Policy and related procedures, the following terms are defined.

“ALARA Investigation Levels” are pre-set dosimeter reading values that trigger formal reviews by Radiation Safety Staff. [ALARA stands for “as low as reasonably achievable” and is a radiation protection philosophy whereby the objective is to keep radiation doses to individuals and populations as far below (maximum) regulatory limits “as is reasonably achievable”.

“ALARA Investigation Level 1” means total radiation doses in any single calendar quarter (e.g., January 1 to March 31) above the following:
- Effective Dose Equivalent (EDE) [“whole body”] above 125 mrem
- Lens Dose Equivalent (LDE) above 375 mrem
- Shallow (“Skin”) Dose Equivalent (SDE) above 1250 mrem
- Extremity Dose reading above 1250 mrem

“ALARA Investigation Level 2” means total radiation doses in any single calendar quarter (e.g., January 1 to March 31) above the following:
- Effective Dose Equivalent (EDE) [“whole body”] above 375 mrem
- Lens Dose Equivalent (LDE) above 1125 mrem
- Shallow (“Skin”) Dose Equivalent (SDE) above 3750 mrem
- Extremity Dose reading above 3750 mrem

“Dose Equivalent” means the absorbed radiation dose to a human being, modified by appropriate radiation weighting factors, depending on the type of ionizing radiation source, or tissue/organ weighting factors (as may be necessary).

“Effective Dose Equivalent” (for the purposes of this policy) means the deep dose equivalent (tissue dose from external radiation sources at 1 cm below the surface of the skin) as measured by a radiation dosimeter, adjusted where appropriate by mathematical formulas to take into account the wearing of protective lead garments in the presence of diagnostic energy x-ray radiation.

“Extremity Dose” means the dose equivalent (tissue dose from external radiation sources) to the hands or forearms (below the elbows), or to the feet or lower legs (below the knees) determined for a tissue depth of 0.007 cm, as measured by a radiation dosimeter (e.g., ring dosimeter).

“Lens Dose Equivalent” means the dose equivalent (tissue dose from external radiation sources) determined for a tissue depth of 0.3 cm, as measured by a radiation dosimeter.

“Millirem (mrem)” is a unit of measure for any “dose equivalent” terms.

*Date: 07/31/2012*
*Confidential and Proprietary to Thomas Jefferson University Hospitals, Inc.*
“Radiation dosimeters (individual monitoring devices”) means devices designed to be worn by a single individual for the assessment of dose equivalent such as film badges, thermoluminescence dosimeters (TLDs), pocket ionization chambers, etc.

“Shallow (“Skin”) Dose Equivalent” means the dose equivalent (tissue dose from external radiation sources) determined for a tissue depth of 0.007 cm, as measured by a radiation dosimeter.

**Procedure:**
[The following procedures and/or requirements have been approved by the Jefferson Radiation Safety Committee and instituted by the Radiation Safety Officer under his authority as established by federal and state regulations and institutional policy.]

**Dosimeter Wearer Responsibilities**
1. Regardless of whether the dosimeters are issued as required or optional, any employee who is issued any dosimeter is responsible for:
   a. Wearing the dosimeter while on duty in those areas where there is a potential for radiation exposure.
   b. Exchanging worn dosimeters for new ones on the first workday of each wear period (e.g., first day of month or calendar quarter, depending on assigned wear period), unless the new replacement dosimeters' arrival has been delayed, in which case the exchange may be made as soon as possible after the arrival of the new dosimeters).
   c. Taking proper care of dosimeters, as described by Office of Radiation Safety instructions, to avoid damaging or contaminating the dosimeters.
   d. Not storing dosimeters near radiation sources when not being worn.
   e. Not wearing dosimeters when being exposed to radiation sources for personal medical purposes (Notify Radiation Safety if this inadvertently occurs or you are administered a radiopharmaceutical).
   f. Notifying Radiation Safety immediately whenever dosimeters are lost, accidentally damaged, name change is required, place of work has changed, or any reason why accidental exposure may have occurred (i.e., dosimeter accidentally left near source when not worn).
   g. Returning all dosimeters and holders upon termination of duties with/near radiation sources.
   h. Notifying Radiation Safety/dosimeter distributor of pending employment termination.
   i. Otherwise wearing assigned dosimeters in accordance with any other Office of Radiation Safety instructions.
2. Failure to comply with guidelines and responsibilities listed above may result in forfeiture of (optional) dosimeters and/or disciplinary action.

3. Any inquiries related to dosimeter use should be directed to the individual’s supervisor, dosimeter distributor, or Radiation Safety.

Dosimeter Issuance:
Dosimeters are issued and distributed in accordance with internal Radiation Safety Department Procedure RSO-041: “Badging and Distribution”

Review of Dosimetry Readings
1. Dosimetry reports from Jefferson’s dosimetry provider (currently Mirion Technologies) are to be reviewed by Radiation Safety staff within 5 business days of receipt.
2. The purposes of such reviews are to:
   a. Determine if the reading is valid (accurately represents occupational radiation dose).
   b. Identify possible opportunities for intervention to reduce future dose.

3. The reviewer is to examine readings for the following:
   a. Individual readings substantially above others doing similar work.
   b. Individual readings substantially above the wearer’s past recorded readings.
   c. Evidence of misuse or damage to the dosimeter.
   d. Evidence of radioactive contamination to the dosimeter.
   e. Calendar quarter total dose readings above “ALARA Investigation Levels” (see definitions).
   f. Evidence that the wrong analysis algorithms were applied by the vendor in generating the reported reading.
   g. Evidence that the dosimeter had not been properly designated (e.g., “whole body” instead of “collar w/ EDE”).
   h. Any other contributing factor as may be identified in the vendor’s report notes.

4. The reviewer is to look for possible causes for high or unusual readings including:
   a. Badges not being properly worn (wrong location, wrong orientation, worn outside of holder, etc.).
   b. Sub-optimal work practices by the wearer.
   c. Dose to the dosimeter while not being worn (dosimeter left in room during procedures, dose stored near a radiation source or otherwise in a high background area, etc.).
   d. Dose due to the wearer undergoing a medical procedure involving radiation (e.g., wearer administered a Nuclear Medicine radiopharmaceutical as a patient).
   e. Dosimeter exposed to unusual environmental conditions (e.g., excessive heat).
   f. Any other potential cause.

5. Regarding the review/investigation process:
   a. Reviews/investigations may require personal contact with the wearer and /or wearer’s supervisor in order to perform an evaluation as per the preceding item 4.
b. All total readings above “ALARA Investigation Levels” are to be performed and documented. “Level 2” investigations should include direct contact with the wearer and evaluation of work practices where feasible, unless the readings are consistent with an historical pattern previously determined to be reasonable for the workload and practices employed.

c. All ALARA Level Investigations are to be documented.

d. Summary reports of readings above ALARA Investigation Levels are reported to the Radiation Safety Committee at its regular quarterly meetings.

6. Readings for dosimeters issued to specifically assess radiation dose to embryo/fetus of a pregnant individual are to be closely scrutinized with regard to cumulative dose being acquired through the gestation period, in case intervention (e.g., job reassignment) is necessary to assure that applicable dose limits are not exceeded.

**Dose History Adjustments:**

1. Readings determined to be due to non-occupational radiation sources, or to be inaccurate due to some identifiable cause may be adjusted.

2. Adjustments to the wearer’s occupational dose history are made after review by the Radiation Safety Officer by notifying the dosimetry vendor in writing, in accordance with the vendor’s procedures.

**Reports to Wearers:**

1. Dosimeter wearers will be notified of radiation doses as obtained as per the criteria specified in regulations contained in 10 CFR 19 or any other applicable state or federal regulation.

2. Individuals may be notified if their cumulative readings in any calendar quarter exceed pre-established ‘investigation levels’, or if any unusual or apparently ‘high’ dosimeter reading(s) are identified by Radiation Safety personnel.

3. Regular dose reports [excised of personal information other than dosimeter wearer id number] are provided to the dosimeter distribution group distributor for availability to wearers.

4. Individuals may also obtain their dosimeter results by making proper request to the Radiation Safety Department. Such requests generally are required to be made in writing to protect the individual’s personal information from release to unauthorized personnel.

**Confidentiality:**

1. Individual radiation dose readings are considered as protected information and access to this information is limited to Radiation Safety personnel, supervisors, program directors, management personnel, members of the Radiation Safety Committee, regulatory inspectors, or others (with RSO approval) with a legitimate need-to-know.

2. Release of individual dose information in any circumstances is limited to the minimum necessary.
3. Any other personal information obtained by the Radiation Safety Department in the administration of the dosimeter program is treated as confidential.

Thomas Jefferson University Hospitals, Inc.
Radiation Protection Practices

1. A student is required to exercise sound radiation protection practices at all times. At no time may a student participate in a procedure utilizing unsafe protection practices.

2. A student must be aware of and enforce the policies and procedures of radiation safety in keeping with institutional, state, and national standards.

3. A student will always wear radiation dosimeters in the Clinical Site.

4. A student will wear the radiation film badge outside the clothing, on the torso. A ring badge will be worn when handling radioactive materials.

5. A student will always remove personal radiation dosimeters while having diagnostic medical or dental radiographs taken.

6. A student who deliberately exposes his/her radiation dosimeter will be suspended and/or dismissed from the program.

7. A student will use appropriate shielding.

8. Radiation protection of the patient and others within the examination room is the student's responsibility when he/she is performing the study.

9. A student may not procedures utilizing ionizing radiation on other students or staff at their request without a prescription for the exam by a physician. The student will be dismissed from the program for this violation.*

10. A technologist or physician may not procedures utilizing ionizing radiation on a student without a prescription for the exam from the student’s physician. The student will be dismissed from the program for this violation.*

*(PA Code, Title 25. Environmental Protection. Department of Environmental Protection, Chapter 211.11.)
Personal Radiation Monitoring

1. Each student is responsible for wearing properly dated radiation dosimeters (body and ring badges) at Clinical Sites.

2. Dosimeters will be mailed to students each month.

3. Each student is responsible for mailing used dosimeters back to the Faculty Advisor.

4. Dosimeter loss or accident must be reported immediately to the Faculty Advisor.

5. The Faculty Advisor receives radiation dose reports from the RSO, and informs each student of his/her exposures.

6. Monthly radiation exposures for students must not exceed the maximum permissible dosage to occupationally exposed persons as established by state and federal agencies for radiologic health.

The Office of Radiation Safety maintains a history of each individual’s exposure and anyone may examine his/her own radiation exposure record, or obtain a copy by sending a signed, written request to the Radiation Safety Office.

7. “High” Radiation Dosimeter Readings

High or unusual radiation dosimeter readings are investigated by Thomas Jefferson University’s Radiation Safety Officer. Readings above designated “Investigation Levels” are evaluated with regard to workload and type of duties performed by the dosimeter wearer; adherence to proper work practices; proper care and use of the dosimeter; and possible exposure of the dosimeter to “non-occupational” radiation sources. In cases where it appears that the high readings may be due to inadequate safe work practices or improper use or storage of the dosimeter(s), the wearer is counseled by Radiation Safety Officer and/or the wearer’s supervisor(s).
