## Macintosh (Tiger) Wireless Configuration Setup Instructions

10/7/2008 1

jeff IT

### Enabling your wireless

From the upper right-hand corner of your desktop position your cursor over the opaque inverted triangle on the toolbar and click on it.

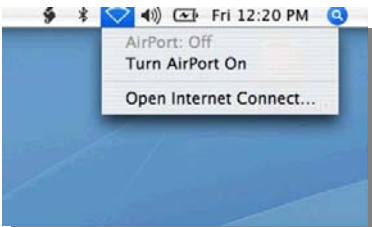

If the wireless icon is already functioning it will appear as the following icon

10/7/2008 2

jeff IT

A drop-down menu now appears, Select the Turn AirPort On option.

10/7/2008 3

jeff IT

Your AirPort icon should appear as shown.

### Configuring Wireless for WPA2 Enterprise

Next you will need to configure the WPA2 Enterprise settings to access the *Arn Wireless* network.

Open your system preferences to access your network settings by clicking on the Apple icon located at the upper left-hand corner of the desktop.

\*Click OK which should bring you back to the network system panel.

*Select System Preferences from the menu.*

10/7/2008 5

jeff IT

The System Preferences window will now open.

Under the *Internet and Network* category click on Network to open the computer's network settings.

10/7/2008 6

**jeff IT**

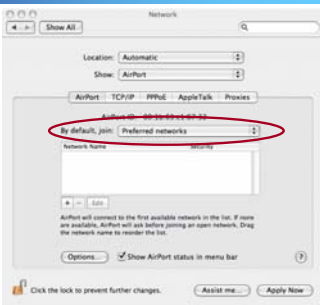

Ensure the AirPort button is highlighted.

10/7/2008 7

**jeff IT**

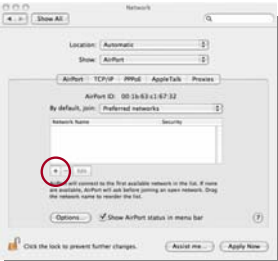

Click on "by default, join:" and change the status from automatic to Preferred Network.

10/7/2008 8

**jeff IT**

Click on the "+" button to add an additional preferred network

10/7/2008 9

**jeff IT**

Type in *swopenwpa* for Network Name.

Under Wireless Security click on the down arrow to select the appropriate security option – WPA2 Enterprise .

After choosing WPA2 Enterprise you will be prompted to enter your user name and password. Enter your Jeffmail user name (campus key) and password and click the OK button.

10/7/2008 10

**jeff IT**

After clicking OK the server verify certificate will appear

Click on the "Show certificate" button and check the "Always trust these certificates" check box.
