10/7/2008 4

jeff IT

7. Enter the following information in the Manually connect to a wireless network dialog box:

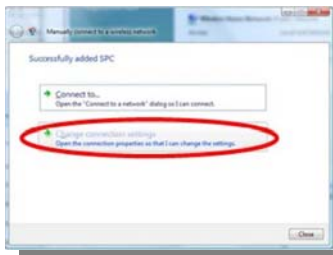

1. Network name: swopenwpa
2. Security type: WPA2-Enterprise
3. Encryption type: AES

10/7/2008 5

jeff IT

8. Click on the Next button
9. In the Successfully added swopenwpa dialog box, click on "Change connection settings":.

10/7/2008 6

jeff IT

10. In the swopenwpa Wireless Network properties dialog box, click the Security tab then click on the Settings... button.

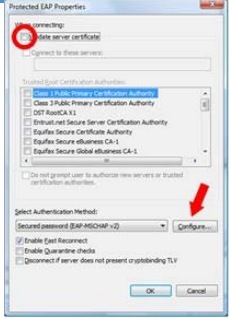

10/7/2008 7

jeff IT

11. In the Protected EAP Properties dialog box, click to remove the check mark in the Validate server certificate check box.

12. Click the Configure... button.

10/7/2008 8

jeff IT

13. In the EAP MSCHAPv2 Properties dialog box, click to remove the check mark in the Automatically use my Windows logon name and password (and domain if any) check box.

10/7/2008 9

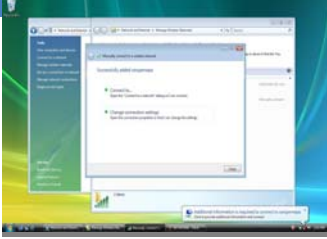

jeff IT

14. Click on the OK button.

15. Complete adding the wireless network configuration by the following:

- Click on the OK button in the Protected EAP Properties dialog box.
- Click on the OK button in the swopenwpa Wireless Network properties dialog box.
- Click on the Close button in the Manually connect to a wireless network dialog box.
- Click on the Close button in the Network and Sharing Center window.

16. When your computer is in range of the swopenwpa wireless network you will get a popup at the bottom of your screen requesting additional credentials. Click this popup dialog.

10/7/2008 10

jeff IT

17. You will be prompted to enter your credentials for the swopenwpa network. In the Enter Credentials dialog box, enter your campus key in the User name field and your password in the Password: field. Leave the Logon domain: field empty.

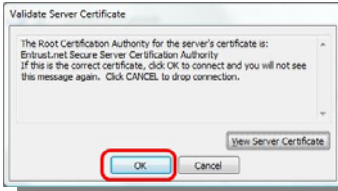

Click on the OK button.

10/7/2008 11

jeff IT

18. You will be challenged to accept the server certificate. The server certificate will list the server name of RELIANT. Accept this certificate by clicking on the OK button in the Validate Server Certificate dialog box.

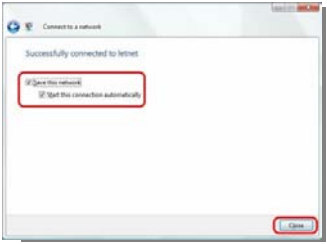

10/7/2008 12

Jeff IT

19. In the **Connect to a network** dialog box, ensure that there are check marks in the **Save this network** and **Start this connection automatically** check boxes. If not, click in them to insert check marks.

20. Click on the **Close** button.

10/7/2008 13

Jeff IT

21. Your computer will then authenticate to the swopenwpa network and you will have access to all network and Internet resources. Your logon information will be saved automatically. You will not have to enter this information again until your password changes or expires.
