1015 Walnut St., Room 903**

Time: 12 pm, FREE LUNCH will be provided

September 30 – Deborah French, University of Pennsylvania

“Megakaryocytes derived from human embryonic stem cells”.

October 15 – Lewis Hsu, Children's National Medical Center, Washington, DC

“Mouse models of 2 sickle cell complications – vaso-occlusion and pulmonary hypertension.”.

October 28 – Jaime Caro, Thomas Jefferson University

“Regulation of HIF-protein levels”.

November 11 – Suba Krishna, Thomas Jefferson University

“Biomarkers in Sickle Cell Disease”.

November 18 – Michael Lisanti, Thomas Jefferson University

“tba”.

December 16 – Philip Wedegartner, Thomas Jefferson University

“Novel Signaling by Heterotrimeric G Proteins at the Golgi”

January 13 – Mark Kahn, University of Pennsylvania

“Signaling pathways in vascular development and disease”.

January 27 – Han-Mou Tsai, Penn State University, Hershey, PA

“Shear stress, von Willebrand factor, and thrombosis”.

February 10 – Long Zheng, Children’s Hospital of Pennsylvania

“ADAMTS13 and TTP”.

February 24 – Koneti Rao, Temple University, “Inherited Disorders of Platelet

Function: A Repository of Untapped Information.”.

March 10 – Gyorgy Hajnoczky, Thomas Jefferson University

“ER-mitochondrial calcium signaling and dynamics”.

March 24 – Suresh Joseph, Thomas Jefferson University

“Structure, function, and regulation of Inositol triphosphate receptors”.

April 14 - Charles Scott, Thomas Jefferson University

“Taking the chemical out of chemical genetics”.

April 28 – Scott Dessain, Lankenau Hospital/ TJU

“Exploring the human antibody response”.
