Career Outcome Rates, Class of 2024

RESULTS FOR

Center City Programs

Career outcome rate is defined as the percentage of graduates who are identified as working full or part time, placed in a residency or fellowship, accepted a job, or continuing education. This is calculated by the following equation:

$$\frac{\text{Working Full or Part Time} + \text{Residency or Fellowship} + \text{Accepted a Job} + \text{Continuing Education}}{\text{All Students} - \text{Not Seeking Placement} - \text{Unknown}}$$

The following data sources were used to identify graduates' career outcome:

- Post-Graduation Survey
- Exit Satisfaction Survey
- Faculty knowledge
- Social media (e.g., LinkedIn, employer website, etc.)
