

## **Job Summary**

Post-doctoral position available in the laboratory of Dr. Adriana Mantegazza, Department of Microbiology and Immunology, Thomas Jefferson University, Philadelphia, Pennsylvania.

Our new laboratory is interested in investigating mechanisms of regulation of inflammatory responses in Dendritic cells, to boost anti-microbial activity and dampen chronic inflammation. We study mechanisms of crosstalk between phagocytosis, inflammasomes and autophagy in dendritic cells, using a combination of biochemical, cell biological and immunological assays in wild-type and genetically modified mice. For additional details, please visit our website: <https://research.jefferson.edu/labs/researcher/mantegazza-research.html> and/or contact

## **Job Requirements**

Applicants should have recently earned a doctoral degree or have less than 5 years of post-doctoral experience and a background in cell biology/immunology. To apply for this position, please visit our careers page at [www.jefferson.edu/hr](http://www.jefferson.edu/hr) and reference job id# 9252907 and include a current CV and the name of 3 references.
