

Post-Doctoral Research Fellow

Lab of Dr. Luis Sigal

Department of Microbiology

The Sigal lab is looking for a research associate or postdoctoral fellow (post-doctoral, postdoc, post-doc) with extensive experience in immunology and vaccines using in vivo mouse models. The research associate position requires 5 years of postdoctoral experience. A postdoctoral position requires 0-4 years of postdoctoral experience. The successful candidate will work on NIAID-funded projects on anti-viral vaccines for various pathogens of concern. Excellent knowledge of immunology and vaccination and solid publication records are essential. Extensive experience with virology, flow cytometry, or single-cell transcriptomics is desirable. The position is available immediately.

Education: The postdoctoral position requires a PhD, MD or DVM with 0-4 years of postdoctoral experience.

Applicants should email their CV to Luis.sigal@jefferson.edu
