

## **Postdoctoral Research Fellow- Job Opening ID 9282594**

### **Department of Biochemistry & Molecular Biology**

#### **Lab of Dr. Michael Soniat**

---

A postdoc position is available in the Soniat lab at Thomas Jefferson University in Philadelphia starting February 2023.

The Soniat lab is a new lab in the Department of Biochemistry and Molecular Biology and seeking creative postdocs to join our team and tackle exciting new questions on structure-function relationships in human genome maintenance. We use a combination of structural biology, single-molecule biophysics, biochemistry, and cell biology techniques to decipher how molecular machines involved in DNA repair and telomere maintenance protect genomic integrity. For more information, please see our website at [www.soniatlab.com](http://www.soniatlab.com).

Applicants with experience in structural biology, single-molecule biophysics, or cell biology are strongly encouraged to apply. However, the only requirements are a passion for science and a track record of innovative research in your graduate career.

If interested, please send a cover letter describing why you are interested in our lab and your goals, a CV, and the names of three references to [michael.soniat@jefferson.edu](mailto:michael.soniat@jefferson.edu).
