

Teva-Thomas Jefferson University
**Health Economics &
Outcomes Research
Fellowship**

OVERVIEW

This two-year Fellowship will provide Fellows with training and exposure to various aspects of health economic and outcomes research in both the academic and industrial settings. The program is designed to facilitate and empower the Fellow in learning and succeeding in the challenging global healthcare market. Alumni of the program will be well prepared for positions within both academia and the commercial environment, including biotechnology and the pharmaceutical industries with public and private payers, and in health policy.

PROGRAM OBJECTIVES

The Fellowship will provide the Fellow with formal education and real-world experience in the following areas:

- Global health economics and outcomes research principles and the application of these principles to research supporting the discovery, development, and commercialization of new drugs
- Experimental design and statistics for research studies assessing clinical, humanistic, and economic outcomes
- Population health management principles and practices, healthcare payers, and policy makers

DESCRIPTION OF THE PROGRAM

Teva Pharmaceuticals has partnered with Thomas Jefferson University (TJU) to offer a two-year Fellowship in Global Health Economics and Outcomes Research (GHEOR). The Fellow will spend their first year at TJU and the second year at Teva. The Fellow may choose to pursue a graduate certificate or master's degree at Jefferson, fully funded through the program. The Fellowship begins in June.

YEAR 1

College of Population Health, Thomas Jefferson University

During the first year, the Fellow will work as a member of the research team at the Jefferson College of Population Health (JCPH). The Fellow is expected to lead several outcomes research projects and at least one of these projects will be conducted in conjunction with Teva. In addition to having an assigned faculty mentor, the Fellow will interact and collaborate with other JCPH faculty and staff. The Fellow will be immersed in population health and health economics and outcomes research through didactic coursework, research experience, presentation publication at methodological and clinical professional organizations, and publication in the peer-reviewed body of scientific literature. Furthermore, the Fellow will be provided with opportunities to shadow key personnel involved in decision-making within Thomas Jefferson University Hospitals.

YEAR 2

Teva

The second year will take place at Teva's Global Development headquarters in the US. The Fellow will learn the real-world practice of health economics and outcomes research in the pharmaceutical industry. Under the guidance of a Teva preceptor, the Fellow will be embedded in and be a part of the GHEOR team. The Fellow will be afforded the opportunity to understand the development of strategy, and directly lead and be responsible for initiatives and projects in support of assets both in early development and late stage commercialization. In addition to learning strategy and supporting project work, the Fellow will participate in governance and other business critical meetings, and work directly with key internal cross-functional stakeholders, including Market Access and Pricing, Clinical Development, Medical Affairs, Marketing, Marketing Research, Regulatory Affairs, Legal, and Market Country colleagues.

PROGRAM EVALUATION

Throughout the two years, quarterly meetings will be held with preceptors and mentors from both Teva and JCPH. The purpose of these meetings is to assess the Fellow's progress and to ensure that program objectives are met. Fellow experiences will also be evaluated to verify they are relevant to the Fellow's activities.

BENEFITS | ELIGIBILITY

BENEFITS

The Fellowship provides a competitive stipend, tuition remission for graduate certificate or master's program coursework, and medical and dental insurance. Vacation, sick days, and reimbursement for travel to Fellowship-related meetings are also provided.

ELIGIBILITY

The Fellow will be selected on a competitive basis from an international pool of candidates with scientific and/or clinical training in healthcare (examples include nursing, medicine, public health, pharmacy). Individuals having completed relevant graduate coursework and experience in health economics and/or outcomes research will be preferred. A steering committee with professionals from JCPH and Teva will select the Fellow.

HOW TO APPLY

Recruitment for the Fellowship will occur at ASHP Midyear Clinical Meeting. Interested individuals must submit their curriculum vitae, a letter of intent, unofficial transcript(s), and a list of three references by **November 30**. All application materials should be emailed to JCPHFellowship@jefferson.edu or sent through the ASHP PPS system. Candidates will be interviewed at ASHP PPS. Selection of the candidate will occur on or before December 31.

THE FELLOWSHIP EXPERIENCE

"The Teva-Thomas Jefferson University Fellowship was a great experience that allowed me to build a strong foundation in conducting HEOR research. Throughout the Fellowship, I was exposed to various stakeholders and learned different perspectives across the healthcare system. I feel confident that I can tackle any HEOR research project and help Teva promote the value proposition of their products."

Seojin Park, PharmD
Fellow 2019-2021

"Through the strong partnership between Thomas Jefferson University and Teva Pharmaceuticals, I have access to a variety of initiatives spanning multiple therapeutic fields that are both diverse and robust. Population health is an overarching theme in this fellowship that has enabled me to view the healthcare system from different stakeholders' eyes. I hope to bring the skillsets I learned from this fellowship to further my career in the pharmaceutical industry."

Anna Chen, PharmD
Fellow 2020-2022
