

Creating Video Quizzes in Studio

Created by the Academic Commons (last updated 10/12/20)

This guide describes how to use Studio to create video quizzes for formative or summative assessment.

Quiz questions can be added to any Studio recording, including linked YouTube videos.

How do I create a video quiz in Studio?

- **Access the options menu (three dots) on any recording's card/tile and select Create Quiz to begin**
 - ❖ You will be prompted to add a title and description to the quiz, and to decide whether students will see an indicator on the video timeline of when each question will appear
 - These settings can be adjusted later by clicking on the gear icon in the upper right corner of the screen
 - ❖ Use the + button along the video timeline at the bottom to add questions. Navigate through the video to add questions at the specific timestamp where you want them to appear
 - Question options include multiple choice, true or false, and multiple answer (select all that apply)
 - Within each question, enter the question text and the possible answers, then click Save
 - ❖ When all questions have been added, click Done in the upper right corner to save the quiz

How do I use a video quiz for formative assessment in Canvas?

- **Video quizzes can be used for formative assessment, giving students a way to check their understanding of a topic or as a tool to focus attention on important topics in a recording**
 - ❖ To use a Studio quiz as a general knowledge check without connecting it to the gradebook, make it available to students by posting it in your course as a Module item or embedded within the Rich Content Editor. Be sure to select Video Quiz Embed, rather than Standard Embed, to make sure that you are posting the video with the quiz questions

 - [How do I use Canvas Studio through the Rich Content Editor?](#) guide from Canvas Support
 - ❖ Students will be shown their scores after completing the quiz at the conclusion of the video
 - ❖ Instructors can view the quiz results by opening the recording (in the course or in Studio) and selecting the Quiz Results tab

-

How do I use a video quiz for summative assessment in Canvas?

- **Video quizzes can also be inserted as graded External Tool assignments and used for summative assessment. Follow these steps to feed video quiz results into the Canvas gradebook for your course**
 - ❖ To add a video quiz assignment to your course, open the **Assignments** tab and create a new Assignment using the **+ Assignment** button
 - ❖ Set the Assignment Type to External Tool and use the Find button to select Studio
 - In the popup window that opens, find the video quiz you want to use and select it. Be sure to select Video Quiz Embed, then use the Embed button to attach the quiz to your Assignment
 - ❖ Adjust the rest of the Assignment options and details and save your work. The quiz scores will now feed into the gradebook for your course
 - ❖ Make the Assignment available within your course by posting it in a Module
