

Interprofessional Student Hotspotting Learning Collaborative

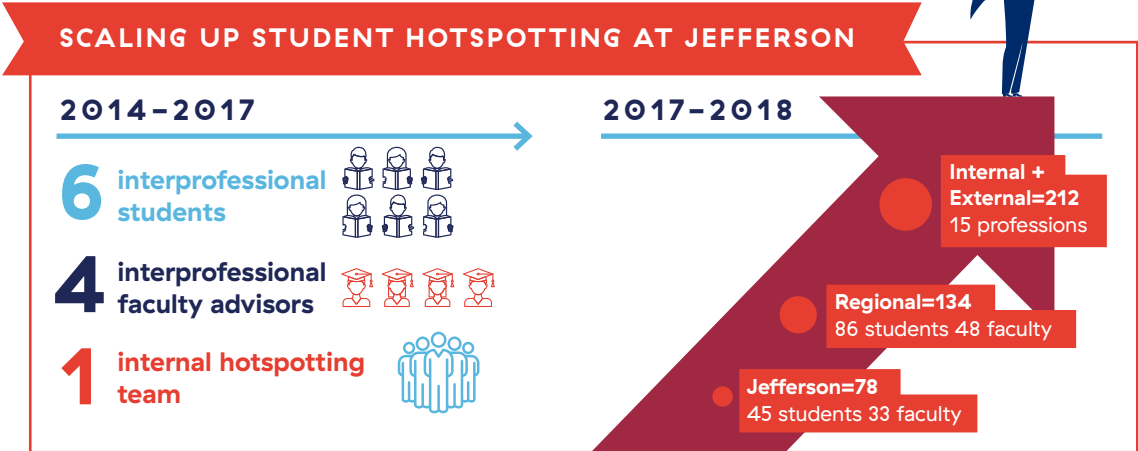

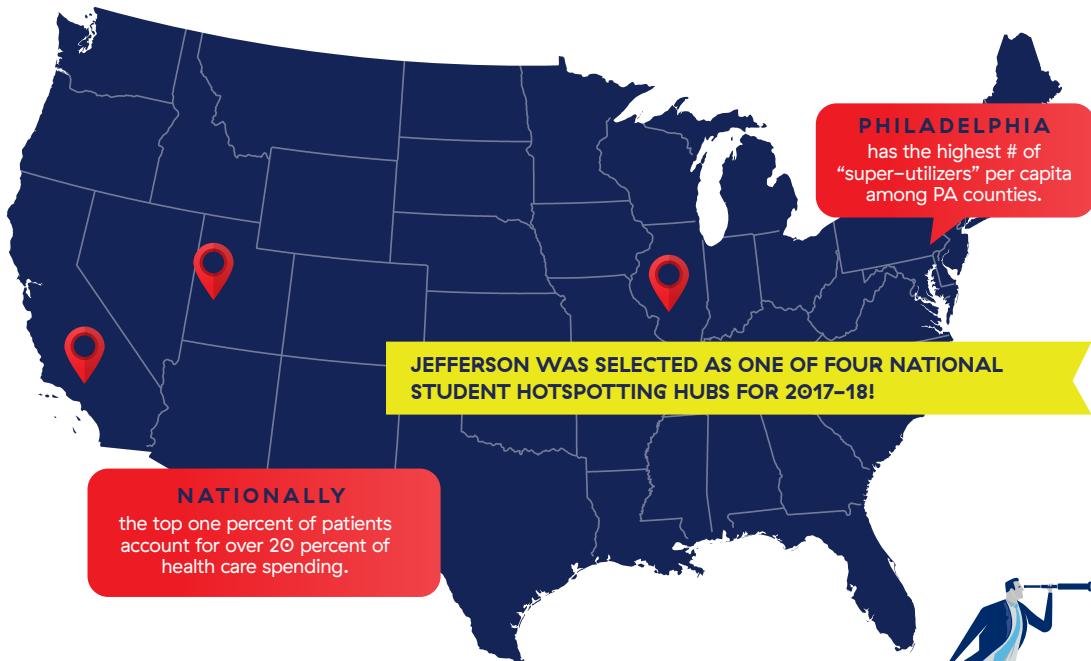

@JeffCIPE
#studenthotspotting

The Interprofessional Student Hotspotting Learning Collaborative is an annual program started by the Camden Coalition of Healthcare Providers in 2014. It trains interprofessional teams of students to learn to work with “super-utilizer” patients who have complex medical and social needs.

The program seeks to improve the health of patients through “hotspotting,” an approach which involves high-touch, patient centered, interprofessional team-based interventions.

Jefferson has participated in the student hotspotting program since 2014. This year, the Jefferson Hub scaled up to support 8 internal teams and serve as a liaison for 12 regional teams.

“ I will carry [the Hotspotting program’s] team oriented, whatever it takes approach with me in my career as a physician. I will also feel more confident effectively utilizing my health professional colleagues, nursing, PT, OT, Pharmacy and others, in coordinating patient care.” — SKMC STUDENT
