

## **Re-Configuring your mail Client / Device for Jefferson.edu on Gmail**

You can use the following information to reconfigure IMAP with many mail clients.

- Use the settings below to reconfigure IMAP settings on your email clients / devices.
- Aside from the settings below, the configuration process for your client / device should be the same as what you did when you originally configured your client /device to access the current Jefferson.edu mail system.
- Note that your username for Gmail is [CampusKey@jefferson.edu](mailto:CampusKey@jefferson.edu).

<b>Incoming Mail (IMAP) Server - requires SSL:</b>	<b>imap.gmail.com</b> Use SSL: <b>Yes</b> Port: <b>993</b>
<b>Outgoing Mail (SMTP) Server - requires TLS:</b>	<b>smtp.gmail.com</b> Use Authentication: <b>Yes</b> Use STARTTLS: <b>Yes (some clients call this SSL)</b> Port: <b>465 or 587</b>
<b>Account Name:</b>	<b>CampusKey@jefferson.edu</b>
<b>Email Address:</b>	<b>CampusKey@jefferson.edu</b>
<b>Password:</b>	<b>Your Campus Key Password</b>

Please note that if your client does not support SMTP authentication, you won't be able to send mail through your client using your Jefferson.edu Gmail address.

Also, if you're having trouble sending mail but you've confirmed that encryption is active for SMTP in your mail client, try to configure your SMTP server on a different port: 465 or 587. Some ISPs will block email ports.
