Department of Medical Imaging & Radiation Sciences

Master of Science Program

Academic Policies and Clinical Education Handbook

2018-2019
Notice of Equal Opportunity
Thomas Jefferson University is committed to providing equal educational and employment opportunities for all persons without regard to race, color, national or ethnic origin, marital status, religion, sex, sexual orientation, gender identity, age, disability, veteran’s status or any other protected characteristic. The consideration of factors unrelated to a person’s ability, qualifications and performance is inconsistent with this policy. Any person having inquiries or complaints concerning Thomas Jefferson University’s compliance with Title VI, Title IX, the Age Discrimination Act of 1975, the Americans with Disabilities Act, or Section 504 of the Rehabilitation Act is directed to contact their Student Affairs Dean or Human Resources – Employee Relations, who have been designated by Thomas Jefferson University to coordinate the institution’s efforts to comply with these laws. Any person may also contact the Assistant Secretary for Civil Rights, U.S. Department of Education, Washington, D.C. 20202, or the Director, U.S. Department of Education, Office for Civil Rights, Region Three, Philadelphia, Pennsylvania, regarding the University’s compliance with the equal opportunity laws.

Required Background Check
Students who are offered admission to Jefferson in a health related program are generally required to pass a criminal background check and child abuse clearance. Please consult with the Program Director or Office of Admissions for clarification on required paperwork for admission. Additionally, some departments and/or programs within the College, as well as some clinical sites may require students to be fingerprinted and/or drug tested. The Office of Admissions, along with your academic program, will provide you with the appropriate information to complete these requirements.

Clinical rotation, fieldwork, and residency sites that require a criminal background check, child abuse clearance and/or fingerprinting may deny a student’s participation in the clinical experience, rotation, fieldwork, or residency because of a felony or misdemeanor conviction or a record of child abuse. Clinical sites may also deny participation in clinical experiences for other reasons, including but not limited to failure of a required drug test, or inability to produce an appropriate health clearance. As participation in clinical experiences, rotations, fieldwork, or residencies is a required part of the curriculum and a requirement for graduation, denial of participation by a clinical site may result in delay of graduation or the inability to graduate from the program.

Regardless of whether or not a student graduates from Jefferson, individuals who have been convicted of a felony or misdemeanor may be denied certification or licensure as a health professional. Information regarding individual eligibility may be obtained from the appropriate credentialing bodies.

Thomas Jefferson University and its College of Health Professions reserve the right to amend, modify, rescind, or implement any policies, procedures, regulations, fees, conditions and courses described herein as circumstances may require without prior notice to persons who might thereby be affected. The provisions of this handbook are not and may not be regarded as contractual between or among the College, its students or its employees or agents.

THOMAS JEFFERSON UNIVERSITY MISSION
We improve lives and provide students with exceptional value in 21st century professional education.

THOMAS JEFFERSON UNIVERSITY VISION
We are reimagining health, education and discovery to create unparalleled value.

Jefferson (Philadelphia University + Thomas Jefferson University)
We are a comprehensive university with preeminence in transdisciplinary, experiential professional education, research and discovery, delivering exceptional value for the 21st century students with excellence in architecture, business, design, fashion, engineering, health, medicine, science and textiles - infused with the liberal arts.

MISSION OF THE PROGRAM
The Mission of the Master of Science program in Medical Imaging and Radiation Sciences is to foster an environment for medical imaging and radiation sciences professionals to develop the knowledge and skills necessary to function as leaders in the areas of administration, education and professional practice and to promote life-long learning and establish a foundation for doctoral study.
PROGRAM GOALS

- To prepare Medical Imaging & Radiation Sciences professionals who are able to function as leaders in Medical Imaging & Radiation Sciences professions
- To develop Medical Imaging & Radiation Sciences professionals who are prepared to contribute to the professional body of knowledge
- To provide a foundation for Medical Imaging & Radiation Sciences professionals to become life-long learners who strive for continued professional growth

PROGRAM STUDENT LEARNING OUTCOMES

Graduates of the MS MIRS program should be able to:
- Demonstrate leadership skills in practice.
- Use critical thinking skills to resolve issues in radiologic or healthcare related problems.
- Apply evidence based research
- Apply effective communication skills in professional settings to maintain collegial and collaborative relationships.
- Analyze, design, conduct research studies and disseminate research findings and methods to contribute to the Medical Imaging & Radiation Sciences and to improve practice
- Implement strategies to effect change within the Medical Imaging & Radiation Sciences profession.
- Evaluate the appropriate ethical standards to practice as a Medical Imaging & Radiation Sciences professional.
- Serve as a role model to promote professionalism within the Medical Imaging & Radiation Sciences.
- Contribute to the community and Medical Imaging & Radiation Sciences profession through service.
- Develop innovative programs for clinical practice and continuing education
THE HANDBOOK
This Academic Policies and Clinical Education Handbook serves as a guide for students enrolled in the Department of Medical Imaging & Radiation Sciences, Jefferson College of Health Professions, Thomas Jefferson University.

A Thomas Jefferson University student is required to uphold a high standard of academic and nonacademic conduct. That standard is presented in this document and will be upheld by the Department of Medical Imaging & Radiation Sciences. Academic and nonacademic misconduct at Thomas Jefferson University is subject to disciplinary action.

This handbook is given to matriculating students during orientation. The Department will obtain documentation of the receipt and review of the handbook.

Each student will be responsible for maintaining his/her knowledge of the information contained in the Academic Policies and Clinical Education Handbook, as well as the Jefferson College of Health Professions Catalog, and Jefferson College of Health Professions Student Handbook. See: www.jefferson.edu/handbook.
NATIONAL CERTIFICATION EXAMINATION
Graduates of the one-year and two-year\(^1\) programs are eligible to take the associated certification examinations of the American Registry of Radiologic Technologists (ARRT), American Registry of Diagnostic Medical Sonographers (ARDMS), Cardiovascular Credentialing International (CCI), Medical Dosimetrist Certification Board (MDCB), and Nuclear Medicine Technology Certification Board (NMTCB), as applicable. Students who pass these examinations receive national certification.

PROGRAM ACCREDITATION
The educational programs of the Department are approved by the University administration. The Program is covered under the University’s accreditation by Middle States Commission on Accreditation.

PROGRAM COMPLIANCE
A student who believes a program is not in compliance with the accreditation standards should submit a written complaint to the Program Director, including documentation for the complaint. The Department Chair, Program Director, and Clinical Coordinator will review the complaint and documentation and respond to the student within three (3) business days of receiving the complaint. If the student is not satisfied with the response, he/she has the right to contact the accreditation body\(^2\).
UNIVERSITY AND JCHP POLICIES AND PROCEDURES
While we have attempted to provide you with a comprehensive departmental handbook, it does not stand alone.

All students enrolled at Thomas Jefferson University are expected to follow a code of behavior consistent with the high standards of the health professions and to uphold the reputation of the University. In addition, students must comply with the rules and regulations duly established within the Jefferson College of Health Professions. See: www.jefferson.edu/handbook

For additional University or for Jefferson College of Health Profession’s policies, including Medical Leave of Absence, Social Media, Student Personal Counseling Center, Occupational Health Network for Employees & Students, and Jefferson Emergency Procedures, also see: www.jefferson.edu/handbook
**Policies on Graduate Student Progression**

**Course Requirements**
1. Prerequisites for courses outlined in the curriculum must be met in order to follow the necessary educational sequence.
2. Students are responsible for accessing courses through Blackboard Learn, https://jefferson.blackboard.com and downloading all course syllabi, handouts, and assignments for each course every semester.
3. Students must complete course evaluations for each of their courses at the end of the semester. A link will be provided to the students at the end of the semester.
4. Students must complete the Health Insurance Portability and Accountability Act (HIPAA) and Safety Modules prior to matriculation.
5. Students are responsible for checking their Jefferson e-mail accounts daily. All Program related correspondence will occur through this account only.

**Policies on Graduate Student Progression in the Medical Imaging & Radiation Sciences Major**
1. A graduate student must maintain a cumulative grade point average of 3.0 and earn a passing grade (≥ C- or a Pass grade in a Pass/Fail course) in all required didactic and clinical courses in the curriculum.
2. Any graduate student who fails to earn a minimum grade of a C- in any course (or who earns a “Fail” in a Pass/Fail course) will be dismissed from the program.
3. A graduate student who earns two (2) C- will be dismissed from the program.
4. A graduate student who does not maintain a 3.0 cumulative grade point average will be dismissed from the program.
5. In addition to Department academic progression standards, students must also meet minimum required academic standards within the College of Health Professions. For academic Probation and Dismissal standards for the Jefferson College of Health (JCHP), please refer to the JCHP Student Handbook.
6. The MS MIRS program begins in September and ends August 31. Students may NOT finish the program early. Official graduation date is August 31.

Every student is required to meet with his or her faculty advisor at least once during each semester.

**Readmission Procedure**
Matriculated students who have withdrawn (administratively or self-initiated) or been dismissed from the College of Health Professions or an academic department of the College must follow the procedures below for readmission to their previous department:
1) Students who wish to apply for readmission within 1 year of withdrawal or dismissal should contact the Department Chair to petition for readmission. The Department Chair will inform the student of the department-specific readmission procedures.
2) Students who have not been enrolled within JCHP for greater than a 1 year period of time must re-apply for admission through the Office of Admissions.

Please note: All readmitted students are subject to the academic and curricular requirements in place at the time of readmission. Additionally, start terms for the readmitted students will be determined by the College and/or program and based on the student’s plan of study; readmitted students cannot assume that they will start in the next immediate term after readmission has been granted. The student’s respective Department Chair will indicate any requirements that the student must meet.
upon readmission. The student will be held responsible for meeting these special criteria of academic performance established with the department upon readmission, in addition to overall Departmental and College requirements for achieving good academic standing.

**ACADEMIC POLICIES**

- Students in all tracks of the MS in Medical Imaging & Radiation Sciences program must achieve a minimum GPA of 3.0 in order to graduate and be awarded the MS degree.
- Part-time students must complete the MS in Medical Imaging & Radiation Sciences curriculum (any track) within two (2) consecutive years. Track-specific courses are taught during the first year and core courses are taught during the second year.
- Each student is required to meet with his/her capstone project advisor monthly, at a pre-scheduled time and location.

**ACADEMIC INTEGRITY POLICY**

Students in the MS in Medical Imaging & Radiation Sciences program are referred to the Jefferson College of Health Professions Academic Integrity Policy published in the JCHP Student Handbook, https://www.jefferson.edu/university/health-professions/student-resources.html. Academic integrity is applicable to both academic and clinical education.

**GRADE APPEAL PROTOCOL**

Students in the MS in Medical Imaging & Radiation Sciences program are referred to the Jefferson College of Health Professions Grade Appeal Protocol published in the JCHP Student Handbook, https://www.jefferson.edu/university/health-professions/student-resources.html.

**STUDENT GRIEVANCE PROCEDURE**

Students in the MS in Medical Imaging & Radiation Sciences program are referred to the Jefferson College of Health Professions Student Grievance Procedure published in the JCHP Student Handbook, https://www.jefferson.edu/university/health-professions/student-resources.html.
CLINICAL PRACTICES AND POLICIES
(For MS tracks that include clinical courses)
COMPETENCY BASED CLINICAL EDUCATION
Competency-based clinical education has been established for the students enrolled in the Department of Medical Imaging & Radiation Sciences programs. It is designed to permit accurate assessment of the knowledge, skills, and attitudes of students in the clinical education component of the program. Evaluation of students’ clinical competencies must be completed by registered technologists under the direction of the Clinical Affiliate Supervisor.

All students must attend a minimum number of clinical training hours (see clinical syllabus). All students must complete clinical competencies in accordance with the requirement of their certification body.

CLINICAL EDUCATION ELIGIBILITY
Students entering MS tracks with clinical components must meet the following requirements or obligations:
- Be a student in good academic standing in the Department of Medical Imaging & Radiation Sciences.
- Maintain a cumulative grade point average of 3.00 or higher.
- Provide and maintain proof of certification in adult, child, and infant cardiopulmonary resuscitation (BLS/CPR/AED for Healthcare Provider).
- Meet program specific technical standards Appendix A.
- Complete all immunization requirements prior to commencing or resuming clinical courses. Failure to meet these health requirements will result in the delay of clinical practical or the failure of clinical courses.
- Be in compliance with the University requirements for influenza vaccination.
- Use personal or public transportation to clinical sites. Commuting time and costs are not determining factors for clinical assignments. These time and cost factors are borne solely by the student.
- Additional requirements may be needed.
- Students not in compliance are not permitted to attend classes or clinical

CLINICAL PRACTICES AND POLICIES
1. Attendance at clinical is mandatory.
2. A student who does not demonstrate safe clinical practice will be in violation of clinical practices and policies and is subject to dismissal.
3. A student who does not demonstrate professional behavior and professional practice is subject to dismissal.
4. Safe clinical or professional practice is defined as:
   a. Adhering to the Patients’ Bill of Rights - Appendix B.
   b. Performing clinical duties consistent with the professional standards of ethics - Appendix C
   c. Adhering to the University Community Standards and code of conduct outlined in the University and Department of Medical Imaging & Radiation Sciences handbooks.
   d. Adhering to all clinical practices and policies of the clinical site, JCHP and the Department of Medical Imaging & Radiation Sciences.
   e. Adhering to departmental radiation protection and monitoring practices where appropriate* - Appendix D, E, F, & G (*only applicable to modalities that use ionizing radiation)
VIOLATIONS OF CLINICAL PRACTICES AND POLICIES
Violations of Clinical Practices and Policies will typically be addressed through progressive discipline, as follows:

- First violation – written warning and counseling by the Program Director and/or Clinical Coordinator.
- Second violation – possible suspension or dismissal.
- Third violation – dismissal from the Department.

Depending on the particular circumstances, one or more progressive disciplinary steps may be skipped in instances of particularly serious violations of policies and/or practices, and some egregious violations may result in immediate dismissal from the Department. The clinical education center reserves the right to suspend or terminate from the clinical site a student who does not adhere to established policies of the program or the clinical site. A student who does not maintain appropriate behavior may be suspended or dismissed immediately.

POLICY GOVERNING CLINICAL EDUCATION SCHEDULING
The purpose of the clinical assignment is to correlate didactic knowledge with practical skills and attitudes. The total number of students assigned to any clinical site shall be determined by the Department of Medical Imaging & Radiation Sciences and approved by program accreditation bodies.

The student is subject to all rules and regulations of the clinical affiliate. The clinical affiliate reserves the right to suspend or terminate from the site a student who does not adhere to established policies of the program or the clinical affiliate. A student who does not maintain appropriate behavior may be suspended or dismissed immediately. (Refer to the section entitled "Responsibilities of the Student" on page 15.) Due to the limited number of clinical sites, should a student be asked to leave the assigned clinical site for any disciplinary reason, the Department cannot guarantee the student a new clinical placement. This would result in a failure for the clinical course and dismissal from the program/department.

If a student is suspended or dismissed from a clinical affiliate, the Department Chair, Program Director and Clinical Coordinator will review the circumstances for this action. All parties are encouraged to address the issue promptly in writing (within five (5) business days whenever possible) so that resolution of grievance should require no more than three (3) weeks. If the decision to dismiss is upheld, the clinical dismissal will result in a final grade of “F”. Students who have reason to believe that the grade has been inappropriately assigned may request a review of the grade in accordance with the provisions of the Grade Appeal Protocol, which is published in the JCHP Student Handbook. For dismissal due to Unsafe Clinical Performance, students will follow the Policy on Dismissal for Unsafe Clinical Performance, which is published in the JCHP Student Handbook. See: www.jefferson.edu/handbook.

CLINICAL AFFILIATE ASSIGNMENT
The Program Director or Clinical Coordinator determines student schedules and assignments at clinical affiliates. Assignments at the clinical affiliates are intended to provide the student with a comprehensive clinical education as deemed appropriate by the faculty, and serves to correlate didactic knowledge with practical skills. Students are not guaranteed specific clinical affiliates, however, student input is considered. Should a student be dismissed from his/her clinical affiliate, the department does not guarantee replacement at an alternate site.
The program provides equitable learning opportunities for all students regarding learning activities and clinical assignments.

Any student requesting changes in the clinical schedule must submit written justification for the change to the Program Director and/or Clinical Coordinator. A decision will be made based on the student’s educational needs and site availability.

**RESPONSIBILITIES OF THE CLINICAL AFFILIATE SUPERVISORS/INSTRUCTORS**

The clinical affiliate supervisors/instructors are available to students whenever they are assigned to a clinical setting. Responsibilities include:

- Providing appropriate clinical supervision. Refer to the section entitled “Supervision policy” on page 28
- Student clinical evaluation and feedback.
- Providing orientation to the clinical department.
- Providing feedback to the program director

**RESPONSIBILITIES OF THE DEPARTMENT**

The Department of Medical Imaging & Radiation Sciences/Clinical Coordinator coordinates the daily operations of clinical education. Duties include, but are not limited to:

- Providing clinical education centers.
- Mentoring students.
- Supervising students.
- Advising students.
- Providing guidance to clinical instructors.
- Reviewing program policies and procedures with clinical affiliate supervisor/instructors.
- Visiting clinical sites each semester to observe and evaluate student performance

**RESPONSIBILITIES OF THE STUDENT**

The student is responsible for:

- Displaying professional appearance in compliance with the dress code policy.
- Establishing harmonious working relationships and earning the respect of the Medical Imaging & Radiation Sciences personnel and other members of the health care team through a professional and dignified posture and attitude.
- Using all equipment and materials responsibly and safely.
- Embodying the highest standards of civility, honesty, and integrity.
- Respecting and protecting the privacy, dignity, and individuality of others.
- Observing and assisting the clinical staff.
- Attending and participating in all scheduled clinical activities.
- Consulting with clinical affiliate supervisors and/or departmental faculty for help with problems.
- Participating in the development of an individualized clinical education plan.
- Maintaining an accurate record of clinical examinations/competencies.
- Recording the number and types of evaluations required during each academic semester.
- Submit clinical competencies as required by the Program Director/Clinical Coordinator.
• Submit attendance records (time cards/time sheets) on a weekly basis or as required by Program Director/Clinical Coordinator. Attendance records must be signed by the clinical affiliate supervisor. Late or incomplete attendance records will not be accepted.
• Striving to broaden his/her knowledge and background on clinical subject matter by reading professional literature and attending conferences and seminars.
• Incurring all travel costs and expenses. Use personal or public transportation to clinical affiliates. Commuting time and costs are not determining factors for clinical assignments. These time and cost factors are borne solely by the student.
• Meeting with advisor at least once per semester.
COMMUNITY STANDARDS
Students enrolled at Thomas Jefferson University are required to follow a code of behavior consonant with the high standards and reputation of the University. Standards of professional behavior include honesty, integrity, civility and, where possible, assistance to one’s colleagues with problems or in distress. Students in the MS in Medical Imaging & Radiation Sciences program are referred to the Community Standards, https://www.jefferson.edu/university/academic-affairs/schools/student-affairs/student-handbooks/university-policies/code-of-conduct.html

DEPARTMENT POLICY ON CONDUCT
Students must comply with the rules and regulations of the Department of Medical Imaging & Radiation Sciences. Deviation constitutes misconduct. This includes, but is not limited to:

- Sleeping during a clinical assignment.
- Failure to actively participate in clinical education.
- Leaving a clinical assignment or room/area assignment without the supervisor’s permission.
- Failure to notify Clinical Affiliate and the Program Director/Clinical Coordinator of absence or lateness.
- Using any personal electronic devices including cell phones in the patient-care/clinical education setting.
- Using the hospital computer for any reason EXCEPT hospital business.
- Violation of any duly established rules or regulations.

FAMILY MEMBERS/FRIENDS WORKING AT CLINICAL AFFILIATE POLICY
It may be deemed a conflict of interest for a student to be supervised or evaluated by family members or friends employed at his/her clinical affiliate. If this situation arises, the student should inform his/her Program Director/Clinical Coordinator so that alternative arrangements can be considered.

FAMILY MEMBERS/FRIENDS CLASSROOM & CLINICAL POLICY
At the Clinical Affiliate
- Family and friends should be discouraged from visiting the clinical affiliate. In particular, unsupervised children are not permitted.
- Family and friends must wait in a public area, and are not permitted in scanning or treatment rooms.
- It is not acceptable for students to entertain their family and friends and neglect their professional duties.
- Students may not ask clinical affiliate staff to baby-sit for them.
- TJU’s liability insurance does not extend to students’ family and friends.

In the Medical Imaging & Radiation Sciences (MIRS) Department
- Students should discourage their family and friends from visiting the MIRS department while they (the students) are in class.
- Family and friends are not permitted to attend lectures or laboratory sessions.
- Unaccompanied children are not permitted in the MIRS department.
- Students may not ask faculty or administrative staff to baby-sit for them.
- TJU’s liability insurance does not extend to students’ family and friends.
Failure to comply with the policy may result in disciplinary action up to and including dismissal from the program.

**CELL PHONE POLICY**

Students may not carry cell phones with them during clinical hours. These devices must be placed in lockers. Any student in violation of this policy may be asked to leave his/her clinical affiliate and will be marked absent for that day. It is the student’s responsibility to notify the Program Director and/or Clinical Coordinator of any absence.

For exceptional circumstances necessitating immediate personal communication by phone or text, a student should ask the Clinical Affiliate Supervisor to excuse him/her, attend to the personal business, and return to duty as quickly as possible.

**COMPUTER POLICY**

Students may not use computers for personal business during clinical hours. Personal business includes (but is not limited to) Internet surfing, shopping, emailing and instant-messaging.

Any student in violation of this policy may be asked to leave his/her clinical affiliate and will be marked absent. It is the student’s responsibility to notify the Program Director and/or Clinical Coordinator of any absence.

**STUDENT WORK POLICY**

If a student is employed at any clinical affiliate, he/she must abide by the following policies:

- Students must notify Program officials that they are working at the clinical affiliate.
- Students are not permitted to work during scheduled clinical hours.
- Students may not wear student uniforms or Jefferson ID.
- Students may not accrue competencies during non-clinical hours.
- Students may not apply work time to make-up time.
- Students are not covered by Jefferson liability insurance during non-clinical hours.

**Non-compliance**

Any student not complying with the policies listed will be removed from the clinical affiliate.

- Department Policy on Conduct
- Family Members/Friends Policy
- Cell Phone Policy
- Computer Policy
- Student Work Policy

Any clinical time missed due to a violation of these policies will be made up by the student at a later date. The Program Director and/or Clinical Coordinator in cooperation with the Clinical Affiliate Supervisor will determine make-up time. Further disciplinary action may be taken for habitual violations of policies. Refer to the section entitled "Violations of Clinical Practices and Policies” on page 14.
VENIPUNCTURE POLICY
The ARRT clinical competency requirements include performance of venipuncture for injection of contrast agents and radiopharmaceuticals. In order to participate in the performance of venipuncture on patients, students must:

- Have completed all immunizations as required by JCHP.
- Have current CPR certification, as required by the Department of Medical Imaging & Radiation Sciences.
- Have health insurance, as required by JCHP.
- Have completed a venipuncture certification course, as required by the Department of Medical Imaging & Radiation Sciences.
- Attend and complete institutional venipuncture training, as required by clinical affiliates.

HEALTH INFORMATION CONFIDENTIALITY POLICY:
HEALTH INSURANCE PORTABILITY AND ACCOUNTABILITY ACT (HIPAA)
Students must maintain strict confidentiality of all health information of patients at clinical affiliate sites during and after the course of their clinical rotations. Students may neither use nor disclose health information of patients to which they have access, other than as expressly authorized by the clinical affiliate. Students may not record any patient-identifiable information on their personal documents (e.g. clinical logs). Students must be familiar with and adhere to their clinical affiliate’s HIPAA policy.

PREGNANCY POLICY
If a student becomes pregnant during a component of the program, she may voluntarily inform the Program Director, in writing, of her pregnancy.

- Option 1: The student may continue in the program if she chooses, without modifications to any component of the program.
- Option 2: The student may take a leave of absence from clinical education, but continue her didactic studies. Clinical assignments will be completed when the student returns.
- Option 3: The student may withdraw from the program and reapply in accordance with College policies.
- Option 4: The student, in writing, may withdraw her declaration of pregnancy at any time and/or for any reason.

Due to the need for special radiation protection education, counseling by the Radiation Safety Officer (RSO) is available.
MAGNETIC RESONANCE IMAGING (MRI) SAFETY POLICY
An MR room has a very strong magnetic field that may be hazardous to individuals entering the MR environment if they have certain metallic, electronic, magnetic, mechanical implants, devices, or objects. Therefore, all Medical Imaging & Radiation Sciences students are required to undergo an MRI Safety lecture and MRI Safety Screening prior to MRI rotations or observations.

1. Students will attend an MRI Safety lecture and be screened for MRI Safety clearance in Patient Care and Services in Medical Imaging and Radiation Oncology Fall Semester by the MRI Clinical Coordinator.
2. Students will abide by clinical affiliate MRI Safety Protocols during their clinical rotations and/or observations.

N95 RESPIRATOR POLICY
Medical Imaging & Radiation Sciences students will not be fitted for a N95 respirator masks. MIRS students should NOT enter a patient's room that requires this form of personal protective equipment.

INCIDENT REPORTS AT THE CLINICAL AFFILIATE
If a student becomes ill, is injured, or is involved in an incident during a clinical rotation, he/she must:
1. Report immediately to his/her Clinical Affiliate Supervisor and follow departmental protocol.
2. Immediately contact the Program Director and/or Clinical Coordinator
3. Present a note to the Program Director and/or Clinical Coordinator from the Emergency Room Physician, University Health Physician, or family physician stating the date the student may resume normal duties.
4. Student must report to Occupational Health Network for Employees & Students as soon as possible (215-955-6835).

If a patient is injured while in the student's care, the student must:
1. Make sure that the patient is safe.
2. Report the incident immediately to the Clinical Affiliate Supervisor and follow departmental protocol.
3. Immediately contact the Program Director and Clinical Coordinator.

COMMUNICABLE DISEASES
Should a student be diagnosed as having an infectious disease, he/she must report such diagnosis to the Program Director and/or Clinical Coordinator and the Clinical Affiliate Supervisor. The student may be asked to leave clinical until cleared by his/her physician and Occupational Health Network for Employees & Students. The student must present a physician’s note to the Program Director and/or Clinical Coordinator stating that the student may resume normal duties.
OCCUPATIONAL EXPOSURES TO INFECTIOUS DISEASE AND/OR BLOOD BORNE PATHOGENS

During clinical rotations, students may be exposed to infectious diseases despite the use of personal protective equipment. This may include airborne exposures to influenza or tuberculosis. Whether at Jefferson or at an affiliate, the student should report to Occupational Health Network for Employees & Students (OHN) as soon as possible to review the details of the exposure. OHN will evaluate the student and will follow established protocols in place under the Infection Control Policies of Thomas Jefferson Hospital.

Occupational exposures to blood or body fluids occur in health care and may involve students. If a student sustains an occupational exposure such as a needlestick, splash, or sharps injury, the student should report to OHN immediately with the source patient’s name, medical record number and attending physician’s name. If the exposure occurs during off hours (after 4:00 PM on weekdays or during the weekends), the student should report to the Jefferson Emergency Department. A follow up visit to OHN is recommended the next business day. All Emergency Department visits are billed through the student’s insurance.

OHN will evaluate the occupational exposure in accordance with current guidelines and Pennsylvania statutes. Testing of the source patient will be coordinated through OHN. All evaluation and treatment provided in OHN is free of charge with the exception of the post exposure prophylaxis medication (PEP) that may be prescribed.

If the student sustains an exposure during a rotation at a clinical affiliate, the student should still call or report to OHN as soon as possible after the exposure. OHN will coordinate all efforts with the affiliate where possible.

Detailed information on Occupational Health Network for Employees & Students may be viewed on the OHN website: https://hospitals.jefferson.edu/departments-and-services/occupational-health-network.html. In addition, the needlesticks website, an internal website accessed through Blackboard, has comprehensive summaries of the various topics involving occupational exposures.

Occupational Health Network for Employees & Students is located at 833 Chestnut Street, Suite 205 and is open 7:30am – 4:00pm Monday through Friday. The phone number is (215) 955-6835.
ATTENDANCE REGULATIONS
DIDACTIC INSTRUCTION

Each course syllabus details the attendance policy.

CLINICAL ATTENDANCE RECORDS

Time cards/Attendance Sheets provided by the Department are used for documenting clinical hours. Each student must personally sign or clock "in" and "out." Students who have to sign-in (i.e. no time clock punch) must write down the time and have the designated clinical supervisor sign next to the time. Time not documented must be made up. Under no circumstances is it permissible to sign-in or out or clock-in or out for another student. Any student found guilty of such an offense is subject to dismissal.

CLINICAL EDUCATION HOURS

Total clinical assignments will not exceed 40 hours per week. Assignments on any one day will not exceed 8 hours, unless otherwise requested by the student and approved by the Program Director and/or Clinical Coordinator in conjunction with the Clinical Affiliate Supervisor, or if patient care responsibilities dictate otherwise. No student will be permitted to leave a patient during the course of an examination, even if such completion requires remaining on duty beyond the end of the shift. Clinical hours are scheduled during the regular hours of 7:00am-4:00pm or 8:00am-5:00pm.

Students will be assigned a lunch period each day, which they are required to take. The lunch break will be commensurate with the practice of the department and area/rotation assignment. The lunch break may not be used to make-up or accrue time.

Clinical Affiliate Supervisors may re-schedule students (within an assigned eight hours) to provide complete exposure to the unique learning opportunities in Medical Imaging & Radiation Sciences. The Clinical Affiliate Supervisor must notify the Program Director and/or Clinical Coordinator of these changes. Students will participate in designated procedures during their clinical assignments under the guidance of a supervising technologist in the areas to which they are assigned.

PERSONAL DAYS

Students are allocated one personal day each semester. This time cannot be taken in half-days. Time off must be taken in full days (8 hours). It is not accruable nor is it transferable. A personal time request form must be submitted to the Program Director or Clinical Coordinator. The Clinical Affiliate Supervisor and Program Director and/or Clinical Coordinator MUST be notified when a student is out of clinical.

ABSENCE POLICY

Attendance is required for all clinical education sessions. If a student will be absent from a clinical assignment, he or she must call or email the Clinical Affiliate Supervisor and Program Director and/or Clinical Coordinator prior to the start of the shift. Three or more consecutive absences require a doctor’s note. However, any sick days (even with a doctor’s note) are not considered excused absences – make-up time will be required. Extenuating circumstances will be dealt with on an individual basis.

If an emergency arises requiring an early departure from the clinical affiliate, the student must notify both the Clinical Affiliate Supervisor and the Program Director and Clinical Coordinator. It is the responsibility of the student to make these calls. Absences must be made up at the discretion of the faculty.
PUNCTUALITY
Any student who is not in his/her clinical area at the assigned time will be considered late. Three late arrivals in one semester count as one day’s absence. Habitual lateness could lead to dismissal from the program.

It is the policy of the Department of Medical Imaging & Radiation Sciences that any student who is going to be late must notify both the Clinical Affiliate Supervisor and the Program Director/Clinical Coordinator prior to the start of his/her assigned time. All lost time due to lateness from the clinical area must be made up by the student. Failure to abide by these policies could lead to dismissal from the program.

A student will be advised in writing concerning his/her habitual lateness or violation of the Department of Medical Imaging & Radiation Sciences lateness policies by the Clinical Coordinator and/or Program Director.

Disciplinary actions including suspensions from the clinical affiliate or dismissal from the program may be taken against students who persist in habitual lateness or violations of the Department of Medical Imaging & Radiation Sciences lateness policies, after previously having been counseled in writing by the Clinical Coordinator and/or Program Director at an Advisement Conference.

MAKE-UP TIME
Arrangements must be made with the Clinical Affiliate Supervisor and approved by the Program Director and/or Clinical Coordinator. Make up time may not be assigned to clinical settings on holidays that are observed by the sponsoring institution. Make up time may not be assigned during non-traditional hours of clinical assignments such as weekends. Jefferson’s liability insurance covers students during make up time assignments. All clinical absences must be made up at the clinical affiliate where the time was missed, consistent with the room assignments in effect when the absence occurred.

The make-up time form is signed upon fulfillment of the time missed. The form will be submitted to the Program Director and/or Clinical Coordinator.

The lunch break may not be used to make-up or accrue time.

POLICY CONCERNING DEATH IN THE FAMILY
Upon notification to the Program Director, students will be allowed a minimum of three (3) days of leave of absence for death in the immediate family. Immediate family members include parents, grandparents, spouse, brother, sister or child. Leaves of absence requested because of the death of someone other than an immediate family member may be granted by special permission.

HOSPITAL JOB ACTIONS OR STRIKES
Whenever a strike or job action occurs at an assigned clinical site, the student must leave the assignment immediately and report to the Program Director or Clinical Coordinator for further directions.

At no time should a student attempt to cross a picket line to enter a Clinical Affiliate.

JURY DUTY
Being selected for jury duty is a civic responsibility in which the Department encourages students to participate.

Please be advised that the College cannot intervene on the student's behalf should a student be summoned for jury duty.
STUDENT ACTIVITIES
STUDENT ACTIVITIES
Students are encouraged to participate in campus activities, e.g., orientation programs, recruitment functions, social and cultural events, interprofessional activities and Class Night. They have the opportunity to represent the students’ viewpoints on Department, College, and University committees. The University and Thomas Jefferson University Hospital sponsor many volunteer and mentoring programs. Professional organizations, Jefferson Alumni Association, and the College sponsor many programs that focus on career and professional development.

HONORS AND AWARDS
Students are eligible for:
- Department awards for outstanding overall performance
- Awards for clinical excellence
Awards are presented during class night.

PROFESSIONAL SOCIETIES
Students are strongly encouraged to participate in professional activities and to seek memberships in national, state, and local societies. These organizations sponsor competitions for students and several offer scholarships and educational grants.

PROFESSIONAL ORGANIZATIONS
- American Society of Radiologic Technologists (ASRT)
- American Society of Allied Health Professions (ASAHP)
- Delaware Valley Society of Nuclear Medicine Technology (DVSNMT)
- Association of Collegiate Educators in Radiologic Technology (ACERT)
- Pennsylvania Radiological Society (PRS)
- Philadelphia Society of Radiologic Technologists (PhilaSRT)
- Society of Invasive Cardiovascular Professionals (SICP)
- Society of Nuclear Medicine and Molecular Imaging (SNMMI)

HONOR SOCIETIES
- Alpha Eta Society (Honor society for health professionals) http://www.alphaeta.net
- Lambda Nu Society (Honor society for radiologic and imaging science professionals) http://www.lambdanu.org
ADDITIONAL POLICIES
SUPERVISION POLICY

Until the student achieves and documents competency in any given procedure, that procedure must be carried out under the direct supervision of a registered technologist.

DRESS CODE AND APPEARANCE POLICY

Dress and appearance standards promote a consistent professional image and help patients and employees feel safe, confident, and comfortable. One must present a professional appearance at all times. The following charts list the acceptable and unacceptable dress and appearance standards.

Uniforms are required for students in clinical tracks. Students in the PET/CT track are required to wear a lab coat in addition to the uniform.

**Grooming standards**

**Body odor**
- Must practice personal hygiene and be free of offensive odor.
- **Not Acceptable:** Perfume, lotion, or cologne that might interfere with those who are ill or allergic to such odors or fragrances.
- Clothing and body with smoke odor.

**Hair-head**
- Must practice personal hygiene and hair must be neat, clean, and well groomed.
- Long hair must be neatly tied back away from face, neck, and shoulders to avoid patient and equipment contact.
- Hair colors must be of natural, traditional tones.

**Hair-face**
- Nose and ear hair must be trimmed and maintained.
- Facial hair including mustache and beard must be short and neatly trimmed and maintained.

**Makeup**
- Makeup should be worn conservatively.
- If worn, makeup must appear professional and natural and should be conservative in styles and colors.

**Hair accessories**
- Solid white, black or navy blue hair bands or ties.

**Fingernails**
- Nail length must be less than ¼ inches.
- No artificial nails.
- No nail polish.

**Gum**
- Chewing gum is not permitted.

**Non-compliance**
Any student not complying with the dress code and appearance policy will be removed from the clinical affiliate. Any clinical time missed due to a dress and appearance standards violation will be made up by the student at a later date. The Program Director and/or Clinical Coordinator in cooperation with the Clinical Affiliate Supervisor will determine make-up time.

**CONFIDENTIALITY OF STUDENT RECORDS**
Appropriately maintaining the security and confidentiality of student records and other program materials protects the student’s right to privacy. Student records are maintained in accordance with the Family Education Rights and Privacy Act (Buckley Amendment). Student records at the clinical sites are maintained by the student/ and or clinical supervisor and are not to be placed in open, public areas of the department.
Appendix A

TECHNICAL STANDARDS FOR A NUCLEAR MEDICINE TECHNOLOGIST

In order to participate in and complete the PET portion of the PET/CT program, a student must meet the following technical standards, which are based on recommendations by the ASRT.

1. Sufficient visual acuity to accurately prepare and administer radiopharmaceuticals, and other medications, and to monitor imaging equipment as well as provide the necessary patient assessment and care.

2. Sufficient auditory perception to receive verbal communication from patients and members of the healthcare team, and to assess the health needs of people through monitoring devices such as intercom systems, blood pressure gauges, and fire alarms.

3. Sufficient gross and fine motor coordination to respond promptly and to implement skills related to the performance of NM, such as positioning, transporting and imaging patients. NM technologists must be able to lift and transport lead blocks or radionuclide generators weighing up to 50 pounds. In addition, NM technologists must perform venipuncture on a regular basis.

4. Sufficient communication skills (verbal, reading, writing) to interact with individuals and to communicate their needs promptly and effectively, as may be necessary in the patient’s interest.

5. Sufficient intellectual and emotional function to plan and implement patient care.

Examples of specific technical standards the NM student must be able to meet are:

- Lift, transfer and/or move patients from wheelchair/stretch to imaging table
- Lift, move, reach or push NM equipment
- Manual dexterity and ability to bend/stretch
- Distinguish colors and shades of gray
- Demonstrate effective interpersonal skills, including patient instruction
- Read and extract information from the medical chart or patient requisition
- Explain the clinical study verbally and/or in writing
- Physical and mental abilities to handle moderate and frequent exposure to infectious agents (blood, urine) and moderate exposure to ionizing radiation
TECHNICAL STANDARDS FOR A COMPUTED TOMOGRAPHY TECHNOLOGIST

In order to participate in and complete the CT portion of the PET/CT program or the CT track, a student must meet the following technical standards, which are based on recommendations by the ASRT.

1. Sufficient visual acuity to administer contrast agents accurately and to monitor imaging equipment as well as provide necessary patient assessment and care.
2. Sufficient auditory perception to receive verbal communication from patients and members of the healthcare team, and to assess the health needs of people through the use of monitoring devices such as intercom systems, blood pressure gauges and fire alarms.
3. Sufficient gross and fine motor coordination to respond promptly and to implement skills related to the performance of CT, such as positioning, transporting and imaging patients. CT technologists must be able to manipulate equipment such as the scan console and power injectors. In addition, CT technologists must perform venipuncture on a regular basis.
4. Sufficient communication skills (verbal, reading, writing) to interact with individuals and to communicate their needs promptly and effectively, as may be necessary in the patient’s interest.
5. Sufficient intellectual and emotional function to plan and implement patient care.

Examples of specific technical standards that the CT technologist must be able to meet are:

- Lift, transfer and/or move patients from wheelchair/stretcher to scan table, including trauma patients.
- Physical agility: sitting (4-7 hours).
- Physical and mental abilities to handle moderate and frequent exposure to infectious agents (blood, urine, etc.)
- Manual dexterity and ability to bend/stretch.
- Distinguish colors and shades of gray.
- Demonstrate effective interpersonal skills, including patient instruction.
- Read and extract information from the medical chart or patient requisitions.
- Explain the clinical study verbally and/or in writing.
TECHNICAL STANDARDS FOR AN INVASIVE CARDIOVASCULAR TECHNOLOGIST (ICVT)

An Invasive Cardiovascular Technologist is typically employed in a hospital to assist physicians with cardiac catheterization procedures and provide direct patient care.

Clinical and laboratory assignments for the Invasive Cardiovascular program require certain physical demands that are the technical standards of admission. These standards are based upon the minimum tasks performed by graduates of the program. Listed below are the technical standards which all applicants are must meet in order to participate and complete the ICVT program.

1. Sufficient visual acuity to read catheterization procedure prescriptions and charts, observe conditions of the patient and evaluate hemodynamic monitoring equipment.
2. Sufficient auditory perception to receive verbal communication from patients and members of the healthcare team and to assess the health needs of people through the use of monitoring devices such as intercom systems, cardiac monitors, respiratory monitors and fire alarms.
3. Sufficient gross and fine motor coordination to respond promptly and to implement skills related to the performance of imaging exams, such as movement of patients and equipment.
4. Sufficient communication skills (verbal, reading, writing) to interact with individuals and to communicate their needs promptly and effectively, as may be necessary in the patient's/client's interest.
5. Sufficient intellectual and emotional function to plan and implement patient care.

Examples of specific technical standards the Invasive Cardiovascular Technology student must be able to meet are:

- Lift, transfer and/or move patients from wheelchair/stretcher to procedure table
- Lift, move, reach or push equipment
- Manual dexterity and ability to bend/stretch
- Physical agility: sitting (4-7 hours), standing (4-7 hours)
- Carry 12-30 pounds (lead aprons) while working
- Distinguish colors and shades of gray
- Demonstrate effective interpersonal relation skills, including patient instruction
- Physical and mental abilities to handle moderate and frequent exposure to infectious agents (blood, urine etc.) and moderate exposure to frequent ionizing radiation
- Read and extract information from the medical chart or patient requisitions
- Explain the clinical study verbally and/or in writing
- Prepare patient for cardiac catheterization procedures
Appendix B

PATIENTS’ BILL OF RIGHTS

We consider you a partner in your hospital care. When you are well informed, participate in treatment decisions, and communicate openly with your doctor and other health professionals, you help make your care as effective as possible. This hospital encourages respect for the personal preferences and values of each individual.

While you are a patient in the hospital, your rights include the following:

- You have the right to considerate and respectful care.
- You have the right to be well informed about your illness, possible treatments, and likely outcome and to discuss this information with you doctor. You have the right to know the names and roles of people treating you.
- You have the right to consent to or refuse a treatment, as permitted by law, throughout your hospital. If you refuse a recommended treatment, you will receive other needed and available care.
- You have the right to have an advance directive, such as a living will or health care proxy. These documents express your choices about your future care or name someone to decide if you cannot speak for yourself. If you have a written advance directive, you should provide a copy to your family, and your doctor.
- You have the right to privacy. The hospital, you doctor, and others caring for you will protect your privacy as much as possible.
- You have the right to expect that treatment records are confidential unless you have given permission to release information or reporting is required or permitted by law. When the hospital releases records to others, such as insurers, it emphasizes that the records are confidential.
- You have the right to review your medical records and to have the information explained except when restricted by law.
- You have the right to expect that the hospital will give you necessary health hospital services to the best of its ability. Treatment, referral, or transfer may be recommended. If transfer is recommended or requested, you will be informed of risks, benefits, and alternatives. You will not be transferred until the other institution agrees to accept you.
- You have the right to know if this hospital has relationships with outside parties that may influence your treatment and care. These relationships may be with educational institutions, other health care providers, or insurers.
- You have the right to consent or decline to take part in research affecting your care. If you choose not to take part, you will receive the most effective care the hospital otherwise provides.
- You have the right to be told of realistic care alternatives when hospital care is no longer appropriate.
- You have the right to know about hospital rules that affect you and your treatment and about charges and payment methods. You have the right to know about hospital resources, such as patient representatives or ethic committees that can help you resolve problems and questions about your hospital stay and care.
- You have responsibilities as a patient. You are responsible for providing information about your health, including past illnesses, hospital stays, and use of medicine. You are
responsible for asking questions when you do not understand information or instructions. If you believe you can't follow through with your treatment, you are responsible for telling your doctor.

- This hospital works to provide care efficiently and fairly to all patients and the community. You and your visitors are responsible for being considerate of the needs of other patients, staff, and the hospital. You are responsible for providing information for insurance and for working with the hospital to arrange payment, when needed.

- Your health depends not just on your hospital care but, in the long term, on the decisions you make in your daily life. You are responsible for recognizing the effect of life-style on your personal health.

- A hospital serves many purposes. Hospitals work to improve people's health; treat people with injury and disease; educate doctors, health professionals, patients, and community members; and improve understanding of health and disease. In carrying out these activities, this institution works to respect your values and dignity.
Appendix C

ASRT/ARRT CODE OF ETHICS

1. The radiologic technologist conducts himself/herself in a professional manner, responds to patient needs and supports colleagues and associates in providing quality patient care.

2. The radiologic technologist acts to advance the principal objective of the profession to provide services to humanity with full respect for the dignity of mankind.

3. The radiologic technologist delivers patient care and service unrestricted by concerns of personal attributes or the nature of the disease or illness, and without discrimination, on the basis of sex, race, creed, religion or socioeconomic status.

4. The radiologic technologist practices technology founded upon theoretical knowledge and concepts, uses equipment and accessories consistent with the purpose for which they have been designed, and employs procedures and techniques appropriately.

5. The radiologic technologist assesses situations, exercises care, discretion and judgment, assumes responsibility for professional decisions; and acts in the best interest of the patient.

6. The radiologic technologist acts as an agent through observation and communication to obtain pertinent information for the physician to aid in the diagnosis and treatment of the patient, and recognizes the interpretation and diagnosis are outside the scope of practice for the profession.

7. The radiologic technologist uses equipment and accessories, employs techniques and procedures, performs services in accordance with an accepted standard of practice and demonstrates expertise in minimizing the radiation exposure to the patient, self and other members of the health care team.

8. The radiologic technologist practices ethical conduct appropriate to the profession and protects the patient’s right to quality radiologic technology care.

9. The radiologic technologist respects confidences entrusted in the course of professional practice respects the patient’s right to privacy and reveals confidential information only as required by law or to protect the welfare of the individual or the community.

10. The radiologic technologist continually strives to improve knowledge and skills by participating in educational and professional activities, sharing knowledge with colleagues and investigating new and innovative aspects of professional practice.

SNMMI-TS CODE OF ETHICS

1. The Nuclear Medicine Technologist will provide services with compassion and respect for the dignity of the individual and with the intent to provide the highest quality of patient care.

2. The Nuclear Medicine Technologist will provide care without discrimination regarding the nature of the illness or disease, gender, race, religion, sexual preference or socioeconomic status of the patient.

3. The Nuclear Medicine Technologist will maintain strict patient confidentiality in accordance with state and federal regulations.

4. The Nuclear Medicine Technologist will comply with the laws, regulations, and policies governing the practice of nuclear medicine.

5. The Nuclear Medicine Technologist will continually strive to improve his/her knowledge and technical skills.

6. The Nuclear Medicine Technologist will not engage in fraud, deception, or criminal activities.

7. The Nuclear Medicine Technologist will be an advocate for his/her profession.

_Revised and adopted by the Society of Nuclear Medicine Technologist Section, June 2004._
CCI Code of Ethics

The purpose of the CCI Code of Ethics is to acknowledge the Applicant’s, Candidate’s and Registrant’s acceptance of the responsibility and trust conferred upon it by the organization and to acknowledge that earning a CCI credential is a privilege that must be earned and maintained. The delivery of safe, competent and ethical patient care is a responsibility of the highest order. This document sets forth the Code of Ethics to be adhered to by credentialed cardiovascular technologists awarded the CCI credentials:

- Advanced Cardiac Sonographer (ACS)
- Certified Cardiographic Technician (CCT)
- Certified Rhythm Analysis Technician (CRAT)
- Registered Congenital Cardiac Sonographer (RCCS)
- Registered Cardiac Electrophysiology Specialist (RCES)
- Registered Cardiovascular Invasive Specialist (RCIS)
- Registered Cardiac Sonographer (RCS)
- Registered Phlebology Sonographer (RPhS)
- Registered Vascular Specialist (RVS).

All credentialed cardiovascular technologists awarded a CCI designation shall, in their professional activities, sustain and advance the integrity and honor of the profession by adhering to this Code of Ethics. Applicants, Candidates and Registrants who intentionally or knowingly violate any provision of the Code of Ethics will be subject to action by a peer review panel, which may result in revocation of the certification.

1. As a credentialed cardiovascular technologist / technician or Applicant / Candidate of CCI Examinations, I will place the safety, health and protection of the patient above all other interests.
2. As a credentialed cardiovascular technologist / technician or Applicant / Candidate of CCI Examinations, I will demonstrate and maintain professional competence in all aspects of patient care and within the scope of practice as defined by my employer.
3. As a credentialed cardiovascular technologist / technician or Applicant / Candidate of CCI Examinations, I will represent my credential(s) accurately, honestly, and will not attempt to maintain CCI credentials by fraud, deception or artifice.
4. As a credentialed cardiovascular technologist / technician or Applicant / Candidate of CCI Examinations, I will not knowingly assist another person or persons in obtaining or attempting to obtain or maintain CCI credentials by fraud, deception or artifice.
5. As a credentialed cardiovascular technologist / technician or Applicant / Candidate of CCI Examinations, I will uphold professional standards by adhering to defined technical protocols and diagnostic criteria established by peer review.
6. As a credentialed cardiovascular technologist / technician or Applicant / Candidate of CCI Examinations, I will represent my qualifications honestly and provide only those services for which I am qualified to perform.
7. As a credentialed cardiovascular technologist / technician or Applicant / Candidate of CCI Examinations, I will defend and protect the patient’s right to privacy and confidentiality, unless required to disclose such information by law.
8. As a credentialed cardiovascular technologist / technician or Applicant / Candidate of CCI Examinations, I will consistently maintain and improve professional competence through regular assessment of skills, continuing education, experience and professional training.
9. As a credentialed cardiovascular technologist / technician or Applicant / Candidate of CCI Examinations, I will accept responsibility for maintaining the credential by meeting renewal requirements and remaining in good standing with CCI.

10. As a credentialed cardiovascular technologist / technician or Applicant / Candidate of CCI Examinations, I will voluntarily report any criminal behavior resulting in a conviction of a misdemeanor or felony.

11. As a credentialed cardiovascular technologist / technician or Applicant / Candidate of CCI Examinations, I will avoid deceptive acts which misrepresent my academic or professional qualifications.

12. As a credentialed cardiovascular technologist / technician or Applicant / Candidate of CCI Examinations, I will avoid compromise of professional judgment by conflicts of interest.

13. As a credentialed cardiovascular technologist / technician or Applicant / Candidate of CCI Examinations, I will engage only in legal arrangements and practices in the health-care field.

14. As a credentialed cardiovascular technologist / technician or Applicant / Candidate of CCI Examinations, I will act in a manner free of bias with regard to religion, ethnicity, gender, age, national origin, disability, social or economic status.

15. As a credentialed cardiovascular technologist / technician or Applicant / Candidate of CCI Examinations, I understand that the certificate, logo and marks are the property of CCI and I will not misrepresent or inappropriately use the property of CCI. I agree to return the wallet card and certificate of my credentialing, upon request, to the CCI Board of Trustees.

16. As a credentialed cardiovascular technologist / technician or Applicant / Candidate of CCI Examinations, I will act in a professional manner in my correspondence and interaction with the CCI National Office.

17. As a credentialed cardiovascular technologist / technician or Applicant / Candidate of CCI Examinations, I will uphold and follow all policies and procedures required by the CCI to remain in good standing, and I will abide by CCI’s Code of Ethics.

18. As a CCI credential holder, candidate of CCI examinations, or applicant of CCI examinations, I shall inform CCI of any matters in the past, present, or future that may affect my capability fulfill the requirements to maintain my credential and/or comply with CCI’s Code of Ethics.
Appendix D

RADIATION PROTECTION PRACTICES

1. A student is required to exercise sound radiation protection practices at all times. At no time may a student participate in a procedure utilizing unsafe protection practices.

2. A student must be aware of and enforce the policies and procedures of radiation safety in keeping with institutional, state, and national standards.

3. A student will always wear radiation dosimeters in the Clinical Site.

4. A student will wear the radiation film badge outside the clothing, on the torso. A ring badge will be worn when handling radioactive materials.

5. A student will always remove personal radiation dosimeters while having diagnostic medical or dental radiographs taken.

6. A student who deliberately exposes his/her radiation dosimeter will be suspended and/or dismissed from the program.

7. A student will use appropriate shielding.

8. Students must not hold image receptors during any radiographic procedure.

9. Students must not hold patients during any radiographic procedure when an immobilization method is the appropriate standard of care.

10. As students progress in the program, they must become increasingly proficient in the application of radiation safety practices.

11. Radiation protection of the patient and others within the examination room is the student’s responsibility when he/she is performing the study.

12. A student may not procedures utilizing ionizing radiation on other students or staff at their request without a prescription for the exam by a physician.

   The student will be dismissed from the program for this violation.*

13. A technologist or physician may not procedures utilizing ionizing radiation on a student without a prescription for the exam from the student’s physician.

   The student will be dismissed from the program for this violation.*

*(PA Code, Title 25. Environmental Protection. Department of Environmental Protection, Chapter 211.11.)
Appendix E

PERSONAL RADIATION MONITORING

1. Each student is responsible for wearing properly dated radiation dosimeter(s) (body and ring badges) at Clinical Affiliate Sites and in laboratory classes. No student will be allowed in clinical or the laboratory class without properly dated radiation dosimeter(s) appropriately worn.

2. Any student who does not have the properly dated radiation dosimeter(s) will be suspended from his or her clinical area until he/she has the properly dated radiation monitor. Time lost from the clinical area must be made up.

3. Dosimeters will be given to students each month.

4. Each student is responsible for exchanging the radiation dosimeter(s) on the designated day of each month. Radiation dosimeters are exchanged with the Program Director or Clinical Coordinator.

5. Dosimeter loss or accident must be reported immediately to the Program Director or Clinical Coordinator. The cost of lost radiation dosimeters is the responsibility of the student.

6. Each student is responsible for submitting their dosimeter(s), on time.
   - A $20.00 cash fee will be collected for all unreturned or late radiation dosimeters.

7. The Program Director or Clinical Coordinator receives monthly radiation dose reports from the Radiation Safety Officer, and informs each student of his/her exposures.

8. Monthly radiation exposures for students must not exceed the maximum permissible dosage to occupationally exposed persons as established by state and federal agencies for radiologic health.

9. The Office of Radiation Safety maintains a history of each individual’s exposure and anyone may examine his/her own radiation exposure record, or obtain a copy by sending a signed, written request to the Radiation Safety Office.

10. “High” Radiation Dosimeter Readings
    High or unusual radiation dosimeter readings are investigated by Thomas Jefferson University’s Radiation Safety Officer. Readings above designated “Investigation Levels” are evaluated with regard to workload and type of duties performed by the dosimeter wearer; adherence to proper work practices; proper care and use of the dosimeter; and possible exposure of the dosimeter to “non-occupational” radiation sources. In cases where it appears that the high readings may be due to inadequate safe work practices or improper use or storage of the dosimeter(s), the wearer is counseled by Radiation Safety Officer and/or the wearer’s supervisor(s).

On completion of the clinical rotation students must return their radiation dosimeter(s) to the Program Director or Clinical Coordinator. Students will be billed for unreturned badges.
Policies & Procedures

Policy No: RSO-053
Effective Date: 11/02/2000
Last Revision Date: 06/08/2015

Office of Radiation Safety

Category: Operations - Programmatic
Title: Radiation Dosimeter Use

Policy Owner: John C. Keklak
Contributors/Contributing Departments:

Purpose

To assess employee occupational radiation dose from ionizing radiation sources external to the body.

Policy

Radiation dosimeters ("individual monitoring devices" as defined in 10 CFR 20.1203) are to be issued for the purpose of assessing occupational radiation dose as follows:

1. Radiation dosimeters are to be issued to anyone (employee/student/volunteer) whose assigned duties involve potential exposure to ionizing radiation and whom the Radiation Safety Officer has determined meets the requirements for individual monitoring devices as described in applicable federal or state regulations.

2. Radiation dosimeters may also be required for individuals in specific work areas or performing designated tasks, even if not required by state or federal regulations.

3. Radiation dosimeters may be offered as an option to individuals in areas where use of individual monitoring devices is not required by regulations, but where employees may have concerns about their level of radiation exposure. Optional use must be approved by the appropriate Department and/or Division Head and the RSO.

4. Radiation dosimeter readings are routinely reviewed by Radiation Safety Staff and appropriate follow-up action taken as may be indicated by the results.

Definitions:

For the purposes of this Policy and related procedures, the following terms are defined:

“ALARA Investigation Levels” are pre-set dosimeter reading values that trigger formal reviews by Radiation Safety Staff. [ALARA stands for “as low as reasonably achievable” and is a radiation protection philosophy whereby the objective is to keep radiation doses to individuals and populations as far below (maximum) regulatory limits “as is reasonably achievable”.]

“ALARA Investigation Level 1” means total radiation doses in any single calendar quarter (e.g., January 1 to March 31) above the following:
Effective Dose Equivalent (EDE) ["whole body"] above 125 mrem
Lens Dose Equivalent (LDE) above 375 mrem
Shallow ("Skin") Dose Equivalent (SDE) above 1250 mrem
Extremity Dose reading above 1250 mrem

"ALARA Investigation Level 2" means total radiation doses in any single calendar quarter (e.g., January 1 to March 31) above the following:

- Effective Dose Equivalent (EDE) ["whole body"] above 375 mrem
- Lens Dose Equivalent (LDE) above 1125 mrem
- Shallow ("Skin") Dose Equivalent (SDE) above 3750 mrem
- Extremity Dose reading above 3750 mrem

"Dose Equivalent" means the absorbed radiation dose to a human being, modified by appropriate radiation weighting factors, depending on the type of ionizing radiation source, or tissue/organ weighting factors (as may be necessary).

"Deep Dose Equivalent" ("DDE") means the dose equivalent (tissue dose from external radiation sources) determined for a tissue depth of 1.0 cm, as measured by a radiation dosimeter.

"Effective Dose Equivalent" ("EDE") [for the purposes of this policy] means the deep dose equivalent (tissue dose from external radiation sources at 1 cm below the surface of the skin) as measured by a radiation dosimeter, adjusted where appropriate by mathematical formulas to take into account the wearing of protective lead garments in the presence of diagnostic energy x-ray radiation.

"Extremity Dose" means the dose equivalent (tissue dose from external radiation sources) to the hands or forearms (below the elbows), or to the feet or lower legs (below the knees) determined for a tissue depth of 0.007 cm, as measured by a radiation dosimeter (e.g., ring dosimeter).

"Lens Dose Equivalent" ("LDE") means the dose equivalent (tissue dose from external radiation sources) determined for a tissue depth of 0.3 cm, as measured by a radiation dosimeter.

"Millirem (mrem)" is a unit of measure for any "dose equivalent" term.

"Radiation dosimeters" (aka "individual monitoring devices") means devices designed to be worn by a single individual for the assessment of dose equivalent such as film badges, thermoluminescence dosimeters (TLDs), pocket ionization chambers, etc.

"Shallow ("Skin") Dose Equivalent" ("SDE") means the dose equivalent (tissue dose from external radiation sources) determined for a tissue depth of 0.007 cm, as measured by a radiation dosimeter

**Procedures:**
[The following procedures and/or requirements have been approved by the Jefferson Radiation Safety Committee and instituted by the Radiation Safety Officer under his authority as established by federal and state regulations and institutional policy.]

**Dosimeter Wearer Responsibilities**

1. Regardless of whether the dosimeters are issued as required or optional, any employee who is issued any dosimeter is responsible for:
   a. Wearing the dosimeter while on duty in those areas where there is a potential for radiation exposure.
   b. Exchanging worn dosimeters for new ones on the first workday of each wear period (e.g., first day of month or calendar quarter, depending on assigned wear period), unless the new
replacement dosimeters’ arrival has been delayed, in which case the exchange may be made as soon as possible after the arrival of the new dosimeters).

c. Taking proper care of dosimeters, as described by Office of Radiation Safety instructions, to avoid damaging or contaminating the dosimeters.

d. Not storing dosimeters near radiation sources when not being worn.

e. Not wearing dosimeters when being exposed to radiation sources for personal medical purposes (The wearer should notify Radiation Safety if this inadvertently occurs or if administered a radiopharmaceutical).

f. Notifying Radiation Safety immediately whenever dosimeters are lost, accidentally damaged, name change is required, place of work has changed, or any reason why accidental exposure may have occurred (i.e., dosimeter accidentally left near source when not worn).

g. Returning all dosimeters and holders upon termination of duties with/near radiation sources.

h. Notifying Radiation Safety/dosimeter distributor of pending employment termination.

i. Otherwise wearing assigned dosimeters in accordance with any other Office of Radiation Safety instructions.

2. Failure to comply with guidelines and responsibilities listed above may result in forfeiture of (optional) dosimeters and/or disciplinary action.

3. Any inquiries related to dosimeter use should be directed to the individual’s supervisor, dosimeter distributor, or Radiation Safety.

Dosimeter Issuance:
Dosimeters are issued and distributed in accordance with internal Radiation Safety Department Procedure RSO-041: “Badging and Distribution”

Review of Dosimetry Readings
1) Dosimetry reports from Jefferson’s dosimetry provider (currently Mirion Technologies) should be reviewed by designated Radiation Safety staff within 5 business days of receipt.
2) Review of dosimetry results by the Radiation Safety Officer or Senior Health Physicist are to be performed at least quarterly.
3) The purposes of such reviews are to:
   a) Determine if the reading is valid (accurately represents occupational radiation dose)
   b) Identify possible opportunities for intervention to reduce future dose
4) The reviewer is to examine readings for the following:
   a) Individual readings substantially above others doing similar work
   b) Individual readings substantially above the wearer’s past recorded readings
   c) Evidence of misuse or damage to the dosimeter
   d) Evidence of radioactive contamination to the dosimeter
   e) Calendar quarter total dose readings above “ALARA Investigation Levels” (see definitions)
   f) Evidence that the wrong analysis algorithms were applied by the vendor in generating the reported reading
   g) Evidence that the dosimeter had not been properly designated (e.g., “whole body” instead of “collar w/ EDE”)
h) Any other contributing factor as may be identified in the vendor’s report notes.

5) The reviewer is to specifically review the DDE, EDE, SDE, LDE, and extremity readings for the dosimeter wear period and the calendar quarter-to-date and year-to-date totals for compliance with occupational dose limits and for any trending that may indicate that annual dose limits could potentially be exceeded.

6) The reviewer is to look for possible causes for high or unusual readings including:
   a) Badges not being properly worn (wrong location, wrong orientation, worn outside of holder, etc.)
   b) Sub-optimal work practices by the wearer
   c) Dose to the dosimeter while not being worn (dosimeter left in room during procedures, dose stored near a radiation source or otherwise in a high background area, etc.)
   d) Dose due to the wearer undergoing a medical procedure involving radiation (e.g., wearer administered a Nuclear Medicine radiopharmaceutical as a patient)
   e) Dosimeter exposed to unusual environmental conditions (e.g., excessive heat)
   f) Any other potential cause

7) Regarding the review/investigation process:
   a) Reviews/investigations may require personal contact with the wearer and /or wearer’s supervisor in order to perform an evaluation as per the preceding item 4.
   b) All total readings above “ALARA Investigation Levels” are to be performed and documented. “Level 2” investigations should include direct contact with the wearer and evaluation of work practices where feasible, unless the readings are consistent with an historical pattern previously determined to be reasonable for the workload and practices employed.
   c) All ALARA Level Investigations are to be documented.
   d) Summary reports of readings above ALARA Investigation Levels are reported to the Radiation Safety Committee at its regular quarterly meetings.

8) Readings for dosimeters issued to specifically assess radiation dose to embryo/fetus of a pregnant individual are to be closely scrutinized with regard to cumulative dose being acquired through the gestation period, in case intervention (e.g., job reassignment) is necessary to assure that applicable dose limits are not exceeded.

Dose History Adjustments:
1) Readings determined to be due to non-occupational radiation sources, or to be inaccurate due to some identifiable cause, may be adjusted.
2) Adjustments to the wearer’s occupational dose history are made after review by the Radiation Safety Officer by notifying the dosimetry vendor in writing, in accordance with the vendor’s procedures.

Reports to Wearers:
1. Dosimeter wearers will be notified of radiation doses as obtained as per the criteria specified in regulations contained in 10 CFR 19 or any other applicable state or federal regulation.
2. Individuals may be notified if their cumulative readings in any calendar quarter exceed pre-established ‘investigation levels’, or if any unusual or apparently ‘high’ dosimeter reading(s) are identified by Radiation Safety personnel.
3. Regular dose reports [excised of personal information other than dosimeter wearer id number] are provided to the dosimeter distribution group distributor for availability to wearers.
4. Individuals may also obtain their dosimeter results by making proper request to the Office of Radiation Safety. Such requests generally are required to be made in writing to protect the individual’s personal information from release to unauthorized personnel.
Confidentiality:
1. Individual radiation dose readings are considered as protected information and access to this information is limited to Radiation Safety personnel, supervisors, program directors, management personnel, members of the Radiation Safety Committee, regulatory inspectors, or others (with RSO approval) with a legitimate need-to-know,
2. Release of individual dose information in any circumstances is limited to the minimum necessary.
3. Any other personal information obtained by the Office of Radiation Safety in the administration of the dosimeter program is treated as confidential.

RADIATION WORKERS WHO BECOME PREGNANT

POLICIES & PROCEDURES

Policy No: RSO-050
Effective Date: 07/04/2008
Revision Date: 05/03/2010

Office of Radiation Safety

Category: Operations - Programmatic
Title: Radiation Workers Who Become Pregnant
Policy Owner: John C. Keklak
Contributors/Contributing Departments:

PURPOSE

1. To minimize ionizing radiation dose to the embryo/fetus of any radiation worker, arising from the occupational radiation exposure of the worker.
2. To comply with pertinent Federal (NRC) and Pennsylvania regulations. [Note: Pennsylvania incorporates the NRC regulations by reference.]

POLICY

Individuals whose occupational duties may include tasks that involve exposure to ionizing radiation are classified as “radiation workers”\(^1\). Female radiation workers who become pregnant have the right to voluntarily “declare” their pregnancy in accordance with Federal and Pennsylvania regulations (See 10 CFR 20.1003 Definition “declared pregnant woman”, below). It is the policy of Thomas Jefferson University/Thomas Jefferson University Hospital (TJU/TJUH) to:

a) Provide instruction and otherwise make information available to potentially pregnant workers about the health effects of ionizing radiation on the embryo/fetus [as required under 10 CFR 19.12],

b) establish procedures to ensure that the dose limits to the embryo/fetus of the declared pregnant worker are within the levels specified in Federal regulations (contained in 10 CFR 20.1208), and

c) establish procedures to minimize ionizing radiation doses to the embryo/fetus of any pregnant worker (declared or undeclared) in accordance with the ALARA (“as low as reasonably achievable”) principle [as required by 10 CFR 20.1101(b)].

\(^1\) Note: Students whose curriculum involves clinical training in the medical uses of ionizing radiation are also considered to be “radiation workers” for the purpose of this policy.

Definitions:
For the purposes of this Policy and related procedures, the following terms are defined.

“Declared pregnant woman” means a woman who has voluntarily informed Thomas Jefferson University or Thomas Jefferson University Hospital (through Notification to the institutional Radiation Safety Officer), in writing, of her pregnancy and the estimated date of conception (month and year only). The declaration remains in effect until either the declared pregnant woman voluntarily withdraws the declaration in writing or is no longer pregnant. [Definition derived from that in Federal regulation 10 CFR 20.1003.]

“Declaration of pregnancy” for the purpose of this Policy and related procedures, means a declaration as described under the definition of “declared pregnant woman”, which is made solely for the purpose of requiring TJU/TJUH to take any measures that may be necessary to ensure that the embryo/fetus does not receive a radiation dose due to the occupational radiation exposure of the declared pregnant woman in excess of the limits set in 10 CFR 20.1208.

“Radiation worker” means a Jefferson employee and/or student whose assigned duties or clinical training requirements involve reasonable likelihood of exposure to ionizing radiation sources such that the individual might receive an annual total effective dose equivalent greater than 50 millirem, and/or the individual actively handles radioactive materials as part of those duties or requirements.

Procedures:

1. Information on radiation and pregnancy is to be incorporated into the radiation safety training provided to those whose duties may routinely involve exposure to ionizing radiation such that they are considered to be “radiation workers”.

2. Pregnant workers may voluntarily “declare” pregnancy by notifying the Radiation Safety Officer in writing. The information to be included in this notice must include the individual’s name, the fact that she is pregnant, the approximate (month and year only) date of conception, and the date the written statement is provided to the RSO. A recommended form letter is attached. The form letter provided in USNRC Regulatory Guide 8.13 (Instructions Regarding Prenatal Radiation Exposure) or a self-composed letter may also be used.

3. The woman may withdraw her declaration of pregnancy in accordance with regulations by providing a written statement to the RSO to this effect. The woman’s status will revert to that in effect prior to her initial declaration without discrimination or repercussion with respect to her job status or work environment. Withdrawal of the declaration does not preclude the woman from subsequently re-declaring her pregnancy.

4. Jefferson will take any necessary steps to ensure that the embryo/fetal dose limits specified in 10 CFR 20.1208 (500 millirem for the duration of the pregnancy; or no more than 50 millirem for the remainder of the pregnancy if it is found that the dose to the embryo/fetus had already exceeded 450 millirem by the time the pregnancy was declared) are not exceeded. An additional operational goal is to permit radiation doses to the embryo/fetus of no more than 50 millirem in any one month. In most cases, no change in job assignments will be necessary, since few Jefferson radiation workers ever exceed these dose levels. Where required, workers may be reassigned to other areas or duties involving lower potential for occupational radiation exposure; or may have some tasks involving radiation exposure reduced in frequency. For any declared pregnant woman whose normal job duties are unlikely to result in embryo/fetal doses above 500 mrem/gestation period any job/task reassignment will be at the discretion of the individual’s supervisor and/or department manager or director and will be subject to the availability of other personnel to perform those tasks being reassigned. [It should be emphasized that these dose limits apply only to radiation doses resulting from the occupational radiation exposure of the woman, and would not include any radiation doses arising from any medical diagnostic or therapeutic procedures performed on the woman or the embryo/fetus; nor would it apply to radiation exposure occurring from background radiation sources.]

5. The Radiation Safety Officer (RSO) or the Senior Health Physicist with the Office of Radiation Safety are available to provide one-to-one counseling to radiation workers who are pregnant (or who are contemplating becoming pregnant) to answer questions and provide additional information based on the woman’s specific work situation. Appointments can be made by contacting the Radiation Safety Office.
6. Radiation Safety will issue any radiation dosimeters as may be warranted to track radiation doses to the embryo/fetus of the declared pregnant woman. Information from radiation dosimeter(s) that may have already been assigned to the woman would be sufficient for tracking fetal dose in most cases, except that the woman will be instructed to wear the dosimeter at the level of the abdomen (as opposed to, for example, the collar or shirt pocket area).

7. The Office of Radiation Safety will treat any information obtained related to an individual’s pregnancy as “confidential”, and such information will be shared only on a “need to know” basis (e.g., with the individual’s supervisor) as may be necessary to ensure compliance with the prenatal radiation dose limits and other regulatory requirements.

8. A “Declaration of Pregnancy” for the purpose of invoking the dose limit requirements as specified in 10 CFR 20.1208 is for that purpose only, and is distinct and separate from any other information that a pregnant woman may provide to representatives of Thomas Jefferson University or Thomas Jefferson University Hospital related to the woman’s pregnancy and its relevance to the performance of her other (i.e. not involving radiation exposure) job duties. Notice to representatives of TJU/TJUH, Inc. other than as specified in Item No. 2 above will not be considered as a formal “Declaration of Pregnancy” for radiation protection purposes.

FORM LETTER FOR DECLARING PREGNANCY

(For use within Thomas Jefferson University/Thomas Jefferson University Hospital only.)

This form letter is provided for your convenience. To make your written declaration of pregnancy, you may fill in the blanks in this form letter, or you may write your own letter containing the required information. Letters should be sent in a confidential envelope or hand delivered to John C. Keklak, Radiation Safety Officer, Suite 820, 919 Walnut St. (Nevil Bldg.)

To: John C. Keklak
Radiation Safety Officer

In accordance with the NRC regulations contained in 10 CFR 20.1208, “Dose to an Embryo/Fetus”, and corresponding Pennsylvania regulations, I am declaring that I am pregnant. I believe that I became pregnant in ____________________ (only the month and year need be provided).

I understand that the radiation dose (resulting from my occupational radiation exposure) to my embryo/fetus during my entire pregnancy will not be allowed to exceed 0.5 rem (500 millirem) (unless that dose has already been exceeded between the time of conception and submitting this letter). I also understand that meeting the lower dose limit may require a change in my job or job duties during my pregnancy. I further understand that I may revoke this declaration at any time for any reason, without fear of reprisal on the part of Jefferson.

Magnetic Resonance (MR) Environment Screening Form

The MR system has a very strong magnetic field that may be hazardous to individuals entering the MR environment or MR system room if they have certain metallic, electronic, magnetic, or mechanical implants, devices, or objects. Therefore, all individuals are required to fill out this form BEFORE entering the MR environment or MR system room.

Please indicate if you have any of the following:

| Yes | No | Brain aneurysm clips/Brain surgery |
| Yes | No | Cardiac pacemaker |
| Yes | No | Implanted cardioverter defibrillator (ICD) |
| Yes | No | Electronic/Magnetically-activated implant or device |
| Yes | No | Heart surgery/Heart valve prosthesis |
| Yes | No | Shunts (Spinal or intraventricular) |
| Yes | No | Shunts/Stents/Filters/Intravascular Coil |
| Yes | No | Spinal cord stimulator |
| Yes | No | Neurostimulator/Biostimulator |
| Yes | No | Insulin or other infusion pump |
| Yes | No | Implanted drug infusion device |
| Yes | No | Internal electrodes or wires |
| Yes | No | Ear Surgery/Cochlear Implants/Stapes Prosthesis |
| Yes | No | Hearing aid (Remove before entering MR scan room) |
| Yes | No | Eye Surgery/Implants/Eyelid Spring/Wires/Retinal Tack |
| Yes | No | Have you ever worked in a metal or machine shop |
| Yes | No | Injury to the eye involving metal or metal shavings |
| Yes | No | Artificial or prosthetic limb |
| Yes | No | Orthopedic Pins/Screws/Rods |
| Yes | No | Joint replacement |
| Yes | No | Endoscopic video capsule |
| Yes | No | Endoscopy or Colonoscopy clips |
| Yes | No | Metal Mesh Implants/Wire Sutures/Wire Staples or Clips/Internal Electrodes |
| Yes | No | IUD, diaphragm or pessary |
| Yes | No | Tattoo’s/Permanent Make-up/Body Piercing/Patches |
| Yes | No | Metallic Foreign Bodies - Bullets/Shrapnel/BB |
| Yes | No | Any other internal/external implant or device |

If you answered yes to any of the above, please explain:

I attest that the above information is correct to the best of my knowledge. I read and understand the entire contents of this form.

UNIVERSITY SERVICES

Admissions
Sidney Kimmel Medical College
Jefferson College of Biomedical Sciences
Jefferson Colleges (Health Professions, Nursing, Pharmacy, Population Health)
The Office of Admissions coordinates the recruitment and enrollment of students at Thomas Jefferson University.

Alumni Affairs
The Jefferson Alumni Association supports Jefferson University by fostering lifelong engagement with alumni, students and faculty.

Bookstore
The Jefferson Bookstore is operated for the service, convenience and benefit of students, faculty and employees.

Campus Security
The Department of Campus Security works closely with the officers of the Philadelphia Police Department and places a high priority on your personal safety.

Career Development
Sidney Kimmel Medical College
All other Jefferson Colleges (JCBS, JCN, JCHP, JCP, JCPH)
Career decision making is a complex process, but the offices for Career Development provide guidance, mentoring and resources to help students every step of the way.

Disability Accommodations
Thomas Jefferson University will provide reasonable accommodations to all qualified individuals with disabilities to allow equal access and full participation to all University sponsored activities and programs.

Commuter Services
Commuter Services provides mass transit and parking information and savings on these services to eligible Jefferson students and employees.

Environmental Health & Safety
The Department of Environmental Health and Safety is committed to assuring the Jefferson community, property and environment are protected against exposures which could result in injury, illness or loss.

Financial Aid
The University Office of Financial Aid identifies and helps students apply for possible sources of funding including grants, scholarships, loans and work study to help meet the cost of education.
**Housing and Residence Life**
The Department of Housing and Residence Life is responsible for assigning on-campus student housing, coordinating building services, and providing support for the students living on campus.

**Information Services & Technology**
IS&T provides help to students for all of their campus computing needs, including email, wireless, printing, and purchasing computers.

**Library and Center for Teaching and Learning**
The Center for Teaching and Learning serves as a central location for faculty, staff, and students to access teaching and learning services at Jefferson. The Scott Memorial Library (SML) is the largest component of the CTL and a campus hub for access to print and non-print resources, study space, and learning technologies.

**Office of International Affairs**
The Office of International Affairs assists departments that want to bring international students to Jefferson, serves as the central resource for international students, provides support for the University’s international initiatives, and assists those who wish to study or do research abroad.

**Photo ID Center**
The Photo ID Center provides the Jefferson Community with the Jefferson ID Card allowing convenient, effective, and secure access to all card related services.

**Student Affairs**
Sidney Kimmel Medical College
All other Jefferson Colleges (JCBS, JCN, JCHP, JCP, JCPH)
Student Affairs is the central support resource throughout a student's college career.

**Student Life and Engagement and The Jefferson Recreation & Fitness Center**
The Office of Student Life and Engagement (OSLE) will assist students in their educational journey and provide them with a foundation for success through educating students about the University and community, and delivering purposeful programming and opportunities for engagement. OSLE is responsible for managing the Jefferson Recreation & Fitness Center, Jefferson’s multipurpose recreation and fitness facility, and its many programs and services.

**Student Personal Counseling Center**
The SPCC offers crisis consultation, individual counseling, couples counseling, group therapy, wellness programs and psychiatric consultation for students.

**Tuition & Cashier’s Office - Student Accounts**
Student Accounts, which includes the Tuition/Cashier and Student Loan Office, provides a number of services, including answering inquiries concerning payment and fees, invoicing and collection of tuition billings, and processing loan checks for payment.
**Occupational Health Network for Employees & Students**
The primary activities of the Occupational Health Network for Employees & Students (formerly University Health Services) is to provide the highest standard of medical care for students, occupational health services for employees and immunization screenings for volunteers of Jefferson.

**University Registrar**
The University Office of the Registrar provides students, faculty, administration and alumni with information and services related to academic records, course scheduling and enrollment, classroom assignments and graduation.
