

NATIONAL CANCER INSTITUTE

Cooperative Human Tissue Network

If you are currently conducting grant projects that needs human specimens, the Cooperative Human Tissue Network (CHTN) can be your resource for human biospecimens. The Cooperative Human Tissue Network (CHTN) is a prospective biospecimen procurement resource funded by the NCI to assist you with your biosample needs. Since 1987 the CHTN has been providing malignant, benign, diseased and normal biospecimens to the research community. These samples are available in a variety of preservation methods including fresh, frozen, paraffin embedded blocks or histologic slides. For more information, please visit <https://www.chtn.org/> or contact us at 1-866-462-2486. We look forward to assisting you with your research needs.
